

iPhone: WPA2 Wireless Setup

Introduction

This document contains set up instructions to connect to the WPA2 wireless network.

- select the **Settings** icon from **iPhone** main screen
- select **Wi-Fi** option

If Wi-Fi is **OFF**, slide it to the **ON** position. A list of available Wi-Fi networks within your range will be listed under the **Choose a Network** section.

- select **Pace_Secure** network
- type *your MyPace Portal Username and password*
- accept the *Entrust.net certificate*

Once you have accepted the certificate, the iPhone will return to the Wi-Fi Networks window. A check mark should be placed next to the Pace_Secure network and you will see a signal bar appear at the top of the display.
