EMBEDDING STORIFY IN EPORTFOLIO

This tutorial will show you how to embed a Storify project in your ePortfolio.

1. After logging into ePortfolio, go to the My ePortfolio tab.

2. Under Pages, choose the page you want to display your Storify on, and select the grey pencil icon next to the desired page.
3. Click on **External** in the toolbar. Select **External media** and drag it to your page.

4. In another tab, log into your **Storify** account and click **View** on the story you wish to display. In the top right corner, you’ll see a button that says **Embed**.
5. Click this and **copy** the embed code.

![Embed Code]

6. Go back to ePortfolio and **paste** the code in the External Media box. Make sure you **retitle** the block before saving.
7. Your Storify will now be embedded within your ePortfolio.
