Here are some key dates of upcoming projects:

**The Big Picture**
- 50th Anniversary of Pace’s Pleasantville Campus: September 16, 2013
- Kessel Center renovation begins: May 2014
- Environmental Center relocation and reconstruction: Winter 2014
- Residence Hall A completion: Summer 2015
- Kessel Center renovation completion: Summer 2015

**On the Horizon**
- Softball field completion: Winter 2015
- Multipurpose field and Fieldhouse construction begins: Winter 2015
- Residence Hall B groundbreaking: Spring 2015
- Multipurpose field and Fieldhouse construction completed: Summer 2015
- Baseball field completion: Fall 2015
- Residence Hall B completion: Summer 2016

Looking back, moving forward.

As the Pace University Pleasantville Campus celebrates its 50th anniversary this year, the University is also undergoing the first phase of a renovation project which will transform and reposition the campus for the next 50 years, or more.

Here are some of the highlights of the first phase of the campus transformation:

1. **Two new residence halls** will be created so that all Pace Westchester residence halls will be located on Pleasantville Campus. The buildings will feature suites with semi-private bathrooms, laundry and kitchenettes on every floor, meeting and learning spaces, open study areas, bike storage, and a small dining center.

2. **The east side of the Kessel Student Center** will be substantially upgraded with an expanded seating area, upgraded commuter lounge, and inviting spaces for student gatherings.

3. **A relocated and enhanced Environmental Center**, with geothermal heat and solar power in the new classroom.

4. **Upgraded athletic facilities**, with a new softball field, a new field house, a resurfaced baseball field, and new multipurpose field which will enable Pace to offer women’s field hockey and lacrosse.

5. **Choate Pond will be revitalized** with the removal of sediment, the reshaping of the pond’s bottom and sides, and the creation of a perimeter walking path and lookout point.

Other colored buildings are proposed for later phases of the plan.

5. Choate Pond will be revitalized with the removal of sediment, the reshaping of the pond’s bottom and sides, and the creation of a perimeter walking path and lookout point.

Other colored buildings are proposed for later phases of the plan.
What does this mean for you?
The first new residence hall will be located on the site that is currently Parking Lot K, the lot next to Goldstein Fitness Center. As we move to a greener campus, with more pedestrian pathways and open spaces, we hope to decrease our dependence on cars and encourage more walking throughout campus. For some of us, that may mean that our typical parking location has changed. Please refer to the chart below and the map on the facing page.

If you are visiting these buildings: Here's where we recommend you park:

- **Goldstein Fitness Center**
  - Lot F (behind Lienhard Hall)
- **Administration Center (DSA, Admissions, etc.)**
  - Lot P (no change)
- **The Townhouses**
  - Lot R (no change)
- **Martin Hall**
  - Lot R (behind Townhouses), Lot O (North Hall), or Lot M (behind Martin Hall)
- **Choate House**
  - Lot H (no change)
- **Paton House**
  - Lot P (no change)
- **Kessel Student Center**
  - Lot R, Lots D, E, F, and V

**Please Note:** In the first phase of construction, the west side of campus will be relatively unaffected so parking recommendations will not change. There will be no overnight parking in Area P near the Administrative building, in Parking Area V near the Kessel Student Center, or Parking Area H near Choate House.

The Importance of Parking Stickers
All cars parked on campus must have an official Pace parking sticker—all others will be ticketed or towed. To get your sticker, bring your Pace ID, license, and registration to the security booth in Goldstein Academic Center.

New Directions
Keep your eyes out for new pedestrian pathways and vehicular routes. To aid students, Shirley Beth’s Way—the path which runs along Choate Pond—will be open to vehicular traffic from 5:00 p.m.–10:00 p.m. once a new pedestrian pathway is paved. Other traffic changes will be indicated throughout campus.
