Emerging Technology.
Evolving Education.

New York City • Westchester

Seidenberg School of Computer Science and Information Systems. Why?

• **Opportunity.** Intern at tech giants or cool start-ups you’ll meet through our impressive network around the globe—from Silicon Valley to Scandinavia. Meet classmates who will become your friends and colleagues on amazing projects. In 2014, 89% of Seidenberg graduates had full-time jobs within one year of graduation.

• **Cutting-edge.** Pursue majors and courses in the highest-demand career areas: cybersecurity, mobile app development, big data, robotics, game design, computer forensics, and healthcare IT.

• **Hands-on.** Gain real-world experience at various on-campus labs, including the student-run Seidenberg Creative Labs, where you’ll manage projects for start-ups and Fortune 100 companies.

• **Explore.** Technology can take you around the world. Work on product development projects in Finland, create mobile technology for youth in Senegal, and present apps and study business intelligence in Stuttgart, Germany.

• **Access.** Get unique access to scholarships and jobs, many available only through the Seidenberg School, as well as support from top organizations including the National Science Foundation and Department of Defense.

Who hires Seidenberg students?

• Google
• Microsoft
• IBM
• FBI
• MasterCard...and more!
