

FALL 2009 – LEARNING COMMUNITIES – PLEASANTVILLE CAMPUS

Drawing I - 72025 - ART 140 - C02

This is a Paired Learning Community and students must also register for ENV 296P CRN 71440.

Theme: [Picturing Animals](#)

Paired Learning Community Course Description: Artists with a love for animals and animal lovers with an interest in art will both find this new learning community to be an engaging, educational experience. We will observe animals closely in the classroom, at the campus Environmental Center, and on fieldtrips such as an organic farm, an animal sanctuary, or a zoo. As students learn to draw by mastering drawing fundamentals, so too will their knowledge of animals - and how our society views animals - grow. Our studies will span companion animals, farm animals, and wildlife, as well as address how animals are represented in art. Through reading, viewing documentary films, and writing creative, research-based essays and reflective papers students will come to better understand the complexity of animal emotions, intelligence, and language, as they more deeply connect with their animal subjects. In the art studio and on site, students will become proficient in basic drawing techniques, studying composition, line, value, texture and perspective with animals as the subject.

Associated Term: Fall 2009

Registration Dates: Apr 20, 2009 to Sep 15, 2009

Levels: Undergraduate

Attributes: Area of Knowledge IV, Inquiry and Exploration, Learning Community

Digital Design I - 73081 - ART 186 - C10

This is a paired Honor's Learning Community. Students must also register for CIS 101 CRN 73200.

Theme: [Art and Interactivity: Introduction to Digital Design and Computing](#)

Paired Honor's Learning Community Course Description: This course brings together the disciplines of Fine Arts and Computer Science as they intersect in the weblog or blog. The Fine Arts portion studies fundamentals of digital design including imaging, collage, typography, composition, form, perspective, and color theory. Students explore artwork and graphics on the Macintosh Platform with Adobe Photoshop, Adobe Illustrator, and the blog format. The Computer Science portion provides an understanding of the role of computers and the skill sets required. Each student's creative abilities are identified and cultivated through the use of technology in the digital media context. Key concepts in computing technology are studied, including software and hardware needs for digital media, digital rights management, privacy, and security, as well as Web page design (HTML), programming (JavaScript), and building one's own digital media presence. Students produce a functional and well-designed blog centered on their interests.

Economics of Gender, Race and Class - 72299 - ECO 266 - C07

This is a Paired Learning Community and open to First Year students only. Students must also register for WS 266 CRN 72321.

Theme: Gender, Race and Class

Paired Learning Community Course Description: This Learning Community examines current and historical differences in pay and employment experience between women and men, and between whites and ethnic and racial minorities. It explores the interdependencies of gender, race, and class in world history, literature, and cultural theory in post-colonial culture. Explanations of the differentials and trends are surveyed; in particular, a variety of economic and cultural theories of discrimination are explored. Students examine definitions of class, data on class differences, and how gender, race, and class roles are constructed, negotiated, and reproduced.

Wellness and Physical Fitness - 72309 - HW 101 - C13

This is a Paired Learning Community and open to First Year students only. Students must also register for PSY 110 CRN 72341.

Theme: Psychological and Physical Well-Being

Paired Learning Community Course Description: This Learning Community will introduce students to a holistic wellness approach to health. The HW course component will identify major health problems in the United States. Students will have the opportunity to have a computerized fitness evaluation test done and objectives to improve or maintain their fitness condition. The teaching strategy is designed to provide an active learning situation for the student. The PSY course component will serve as an introduction to the science and profession of psychology, including coverage of human development, personality, social psychology, motivation, perception, and related topics. (Students may have the opportunity to participate in Psychology Department research projects.)

Topic: Exploring Our Environment - Learning Community - 71489 - INT 197XA - C17

This is a web assisted course that requires attendance on campus and regular online participation.

First Year Learning Community: Open to First Year students only

INT 197XA - Exploring Our Environment - Learning Community

Fulfills COM 200, ENV 110 and 3 credits in Area of Knowledge V.

Learning Community Course Description: Everything we do connects somehow with the natural world. In this learning community, students will discover ways we as individuals can have a positive impact on the environment. They will also explore ways environmental conditions affect our health, recreation/leisure activities, and economic situations. This class combines hands-on learning with discussions, guest speakers, and group projects. Students will make presentations on such topics as overpopulation, biodiversity, wildlife, pollution and sustainable farming. Planned field trips include a wildlife sanctuary, an organic farm, a state park, and wetlands.

Economic, Political and Social Dimensions of Immigration - 73202 - INT 198E - C11

INT 198E - Economic, Political and Social Dimensions of Immigration

Course Description: Students will examine the political, social, and economic dimensions of immigration, giving serious consideration to the positive as well as the negative potential of this phenomenon. While attention will be focused on U.S. immigration, this will be located in a broader global context. Each faculty member will bring their discipline's unique perspective to the course as well as explore the myriad ways these are intertwined.
