LIABILITY INSURANCE

Pace University carries general and professional liability insurance that includes coverage for all students in the Physician Assistant Program for claims arising from a student’s activities in satisfaction of the requirements of his or her academic program, including clinical courses, at the University. The University’s general and professional liability insurance does not cover any claim arising from a student’s activities outside of his or her academic programs at the University, including, without limitation, claims arising out of previous or current academic activities at another institution or employment. These insurances apply only to claims brought against the student by third parties; they do not provide coverage for the student if the student is injured or becomes ill from work performed during their clinical course work. It is the student’s responsibility to carry personal medical insurance to cover this potential.

On occasion, a clinical site may require that students performing a clinical placement at its site have their own professional liability insurance in addition to that provided by the University. Therefore, prior to attending a clinical course, students should confirm with the clinical instructor whether students at the clinical site are required to have their own professional liability insurance in addition to that provided by the University.

RISK OF EXPOSURE

Students enrolled in the physician assistant program will be participating in caregiving activities. During these activities, exposure to communicable diseases, including, but not limited to, Hepatitis B (“HBV”), Tuberculosis (“TB”), Human Immunodeficiency Virus (“HIV”), SARS-CoV-2 (Covid-19), and Ebola Virus is possible. By enrolling in a clinical practicum course, students understand that they may contract a communicable disease while acting as a caregiver during a clinical experiences. Students are provided standard precautions education, in accordance with the Centers for Disease Control and Prevention Guidelines, and are expected to practice within those guidelines. Students are also expected to adhere to the policies of the clinical and practicum partners. However, in some cases, even when guidelines are followed, exposure resulting in illness can occur. This is an inherent risk in all health care fields. Students recognize and acknowledge that they are voluntarily accepting this risk as part of enrollment in the program and cannot hold the University responsible for any illness contracted during their clinical placements.
