WELCOME TO THE LIENHARD SCHOOL OF NURSING

Dear Lienhard School of Nursing PhD Students,

The faculty and I applaud your decision to pursue a graduate degree in nursing and are delighted you chose Pace University College of Health Professions Lienhard School of Nursing as the place to do so. The program you are enrolled in will be stimulating, challenging, and sometimes exhausting as you make your way through new terminology, insights, dilemmas, and skills. Faculty and staff are here to help you be successful in your endeavors. As with any new role, there are expectations that will help you be successful as a student and practitioner.

The Core Values of the College of Health Profession are **Commitment to Quality Care, Cultural Competence, Innovation, Integrity, Interprofessional Collaboration**, and **Scholarship**. Nursing is the most trusted profession in the United States, rated highest in honesty and integrity, and it is a privilege for me as dean to serve our nursing programs.

Professionally and personally, I try to adhere to the "platinum rule": Treat others as they wish to be treated, not assuming that how you wish to be treated is necessarily how others wish to be treated. I urge you, as a student, to learn from the wisdom and experience of your professors while advocating for yourself and having agency over your education and the responsibilities you have both to your profession and your studies. As part of these responsibilities, you are required to be familiar with the Lienhard School of Nursing Department of Doctor of Philosophy in Nursing Student Handbook. Our goal is to provide you with the tools to be the best you can be - excellent nurses of the highest caliber!

Increasingly, we seek to incorporate interprofessional education and collaboration in our programs, both required and optional, as effective clinical care and health equity require an integrated approach across professions and disciplines. I encourage you to avail yourself of these opportunities when they arise.

On behalf of the faculty and staff of the College of Health Professions, let me congratulate you on your admission. Our commitment to you is to give you constructive feedback, participate fully in the teaching/learning process, be reflective in our teaching, and adhere to the standards we have established for ourselves, our students, and the profession. We welcome the opportunity to embrace all the privileges, rights, and responsibilities of being your teachers and mentors. I wish you the very best in your studies!

Marcus C. Tye, Ph.D. [he/him]

WELCOME FROM THE CHAIR

Dear PhD students,

Greetings from the Doctor of Philosophy in Nursing Program at Pace University. I am delighted to welcome you!

Our program admitted its first students in the fall of 2017 and continues to admit a fall class each year. The need for the program is great and we are the only Nursing Ph.D. program between Washington Heights in New York City and Binghamton College of SUNY. Our focus is on nurses in the Mid-Hudson region of New York State, although our students come from many other areas, states, and countries. Our mission is unique in that primary health care is the foundation of the program. Primary health care, unlike primary care, focuses on five principles: equitable distribution of all resources; community involvement; prevention; appropriate technology; and using a multisectoral approach. A multisectoral approach recognizes that health is affected by, and affects, housing, education, clean air, and public water supplies. Our students' research focuses on the full range of health care factors from prevention to treatment of illness.

The purpose of our program is to prepare nurses who will be scientists, leaders, and educators. Each graduate is ready to conduct research, discover new knowledge that will impact patient care, and become a steward of the profession. Our graduates are prepared to respond to complex needs related to population health. They are ready to assume leadership positions in diverse health care settings and academia with a particular focus on specific components of primary health care. Our faculty is committed to the success of each student who is admitted to the program. The [PhD in Nursing website](#) contains key information about the program from the admission process and procedures to photos and professional accomplishments of our faculty and students.

Sharon Wexler, PhD, RN, FNGNA, Professor
Chair, Doctor of Philosophy in Nursing Department
swexler@pace.edu

LETTER FROM THE PhD FACULTY

Greetings, PhD in Nursing Students,

The policies in this Lienhard School of Nursing Doctor of Philosophy in Nursing Handbook were developed by faculty and administrators of the Lienhard School of Nursing to provide information to students about what is required of them as they progress in their program of study, and to promote and maintain standards of quality in the PhD Department.

This handbook however, is not the only source of policies and procedures that you are required to be knowledgeable about and to comply with while you are a student in the Lienhard School of Nursing. For example, course syllabi may contain policy statements, and there are many University policies and procedures that are applicable to students in the Lienhard School of Nursing. Sometimes it is necessary or desirable to change a policy, to repeal it, or to create a new one. Consequently, this handbook will be updated and reissued each year effective September 1, and you are responsible for remaining current with any changes as well as changes in policies from other sources. Of course, sometimes questions arise as to whether a policy applies to a particular situation. If you have any questions about the interpretation or application of any policy, please contact the PhD chair.

We wish you every success in your Doctor of Philosophy in Nursing program at the Lienhard School of Nursing.

Best regards from the PhD Faculty

INTRODUCTION TO THE LIENHARD SCHOOL OF NURSING (LSN)

Vision of LSN

The Lienhard School of Nursing will be a leader in innovation and excellence in education, research, and practice in primary health care.

Mission of LSN

The Lienhard School of Nursing is dedicated to offering access and opportunity for qualified individuals of diverse backgrounds, talents, interests, experiences, cultures, and origins to pursue careers within the profession of nursing. As a school set within culturally diverse urban and suburban settings, the Lienhard School of Nursing through community partnerships fosters human growth and dignity and provides primary health care. Faithful to the Pace University motto, "Opportunitas," the School of Nursing is dedicated to and supports commitment to individuals, families, and communities at local, national, international, and global levels to meet current and future health care needs. Essential qualities embodied in nursing education at the Lienhard School of Nursing include the following: the liberal arts and sciences as integral foundations; nursing theory, evidence-based practice, and research as the core body of knowledge; communication, critical thinking, cultural competence, and technological competence as essential skills; and moral and ethical decision-making as values to provide society with professionally prepared nurse leaders. The school provides student-centered learning experiences that foster civic, social, and professional responsibility to embrace the challenges of the future. In keeping with our vision, our mission is to continue excellence in teaching, scholarship, practice, and service to prepare graduates to be nursing leaders in health care in the 21st Century.

Philosophy of LSN

We believe nursing, informed by its rich legacy, is a dynamic, caring art and science that, through intention, facilitates health, healing, and comfort for individuals, families, groups, and communities, locally, nationally, internationally, and globally. We prepare nurses who provide holistic, relationship-centered care within a framework of primary health care in an evolving information age. As lifelong learners, nurses participate in an interactive teaching-learning process; develop a strong sense of self-awareness and reflective thinking, and a spirit of inquiry; demonstrate cultural competence; and communicate their ideas effectively. We graduate professionals who practice in an ethical, legal, and socially responsible manner. The Lienhard School of Nursing baccalaureate curricula are process-oriented, providing a broad foundational base for entry into professional nursing practice. The master's and doctoral curricula provide the depth and breadth of advanced knowledge and skills necessary for practice and advanced clinical leadership, respectively, in primary health care settings.

LSN Goals

The goals of the Lienhard School of Nursing are:

1. To produce competent practitioners of nursing consistent with professional standards, the mission of Pace University, and mission and philosophy of Lienhard School of Nursing.
2. To provide a quality education within urban and suburban settings to serve diverse communities.
3. To provide an environment that fosters teaching, learning and scholarship.
4. To prepare nurses who will provide leadership in addressing the future challenges of global healthcare.

Program Goals

Graduates of the PhD in Nursing program will deepen their ability to think analytically and innovatively to allow them to respond to the complex health care needs of the population of New York City, Hudson Valley, and beyond. Students are prepared to assume leadership positions in healthcare settings and academia and develop and implement nursing outcomes research. The curriculum includes the study of nursing theories, as well as other health-related, interdisciplinary, and educational theories, research methods, and health policy/health economics in a context of multidisciplinary partnerships to provide quality-based, comprehensive health care. A research dissertation is required. This course of study prepares graduates to undertake systematic, applied, funded research to improve patient outcomes

that are sensitive to the quality of nursing care. Graduates are prepared to assume leadership positions in health care settings and academia and develop and implement nursing outcomes research.

The specific purposes of the full time PhD in Nursing Program are to:

1. Provide education in nursing and related theories and empirical research methods to prepare nurse leaders for evidence based primary health care for culturally diverse people.
2. Expand the knowledge base of nursing practice, health care management, and health care policy and economics through the research and scholarship of faculty and students in the nursing research doctoral program.
3. Prepare nurse leaders as scientists, faculty, policy makers, and innovators in health care.

Expected Student Learning Outcomes

Graduates will be prepared to assume leadership positions in health care settings and academia and develop and implement culturally competent, evidence-based research in primary health care for the improvement of population health. They will be prepared to:

1. Synthesize relevant theories from nursing and other disciplines to develop a framework for conducting research with an emphasis on culturally competent primary health care.
2. Generate evidence to be used as the basis for culturally competent primary health care to improve population health.
3. Generate evidence related to clinical, educational, cultural, and organizational issues, needs, and challenges to recommend a course of action for best practices in primary health care.
4. Develop skills in mentorship and leadership roles as nurse scientists in the design, implementation, evaluation, and dissemination of research targeting the advancement of culturally competent evidence-based primary health care.
5. Integrate information technology to support culturally competent, evidence-based primary health care research that contributes to nursing and health care knowledge aimed at the reduction of health disparities.
6. Create change in policy by generating evidence within a culturally competent primary health care perspective.
7. Collaborate with intra and inter-professional scholars as well as with intersectorial networks within academic, research, practice, or policy arenas for local, national, and global initiatives.

Revised September 1, 2017

NURSING TECHNICAL STANDARDS

Pace University complies with the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990, both as amended, as well as state and local laws which prohibit institutions of higher education from discriminating against students with disabilities. Although all applicants and students are held to the same technical and academic standards, reasonable accommodations are provided to qualified individuals with a disability. In order to request a reasonable accommodation, applicants and students should visit Student Accessibility Services, and then contact the Coordinator of Student Accessibility Services for their campus. The ability to meet the technical standards and educational objectives established by the program is essential for the fulfillment of the requirements for the Bachelor of Science in Nursing degree. The academic and technical standards established by the faculty require that all students accepted by the Pace University Undergraduate Nursing Programs possess the physical, cognitive, and behavioral abilities that ensure that they will be able to complete all aspects of the curriculum. Students admitted to the nursing programs must have the intellectual, emotional, and physical abilities to acquire the knowledge, behaviors, and clinical skills needed to successfully complete the entire curriculum and practice nursing as a registered professional nurse. The technical standards outlined below ("Technical Standards"), in conjunction with established academic standards, are followed by undergraduate nursing faculty to select applicants and retain students who possess the intelligence, integrity, physical, and personal as well as emotional characteristics that are necessary to become an effective professional nurse. The faculty must maintain the integrity of the curriculum and preserve those elements deemed essential to the education of a baccalaureate prepared professional

nurse. The faculty and program cannot compromise the health and safety of others and reserves the right not to admit and progress in the nursing curriculum, any applicant who cannot meet the technical standards or who would constitute a direct threat to the health and safety of others, e.g., those individuals who are impaired by alcohol or substance abuse cannot meet the Technical Standards.

Communication

Nursing students must be able to communicate effectively with members of the health care team, including patients and family members verbally and in writing, and be able to record information accurately and clearly. Nursing students must be able to accurately interpret a patient's verbal and non-verbal expressions. Nursing students must be able to critically analyze and convey information on the patient's status to members of the healthcare team in oral, written, and electronic form in a timely manner.

Observation

In both clinical and laboratory settings, students must be able to observe demonstrations of nursing skills and the implementation of patient care utilizing illustrations, models, medical equipment as well as standardized patients, patient simulators and actual human patients. The student must be able to confirm a patient's identity, observe a patient's physical condition and demeanor, obtain a medical history, and perform a complete physical examination directly and accurately. They must then integrate the information obtained through these holistic observations to implement the nursing process. These skills require the functional use of the senses of vision, hearing, smell, and touch.

Motor Skills

Possess and use motor skills in conjunction with the senses of sight, hearing, smell, and touch to accurately collect, interpret and utilize data. Examples include, but are not limited to:

- use of a stethoscope and sphygmomanometer to assess vital signs,
- possess the gross motor skills to provide safe patient care e.g., perform CPR, apply pressure, position, and transfer patients,
- possess the fine motor skills to provide safe patient care e.g., prepare and administer medications, manipulate emergency medical equipment, and change a dressing,
- maintain balance and coordination while responding quickly to and in emergency situations,
- have the endurance to complete all required tasks during the assigned period of clinical practice in order to carry out the nursing process during the delivery of general nursing care or in emergency situations.

Interpretative, Conceptual and Quantitative

Candidates for the degree should possess capabilities that enable them to function effectively and efficiently in the domains of interpretative, cognitive, and quantitative reasoning. Undergraduate nursing students are expected to be capable of developing and seeking out appropriate learning techniques and study habits that allow for an evolving understanding of the baccalaureate curricular content. Students must be able to learn through a variety of teaching-learning modalities, including, but not limited to, classroom instruction, small group activities, individual study, preparation and presentation of assignments, validation of accurate medication administration and calculation of medication dosage, and use of computer technology. They must be able to progressively remember, understand, apply, analyze, evaluate, create, memorize, measure, calculate, reason, and synthesize the essential concepts of nursing, including person, health, and environment. They must also be able to apply these concepts in their clinical student nursing practice through the use of clinical reasoning and clinical judgment. To achieve the goals of clinical competency and patient safety, nursing students are expected to acquire the strategies of problem-solving and critical thinking in order to prioritize patient needs, recognizing urgent or emergent situations as well as demonstrating conscientious detail to the needs of the whole patient and family.

Behavioral and Social

Candidates and students must understand the legal and ethical aspects of the practice of nursing and function within the guidelines established by the law and consistent with the professions (ANA) Scope &

Standards of Practice and Code of Ethics for Nurses and National Student Nurses Association Code of Academic and Clinical Conduct and Code of Academic and Clinical Conduct Interpretive statements for Nursing Students. They must be able to relate to patients and their families, colleagues, faculty, and other members of the health care team with courtesy, maturity, and respect for the dignity and cultural diversity of individuals. This requires that they place the welfare of their patients foremost, and demonstrate honesty, integrity, dedication, compassion, and nondiscrimination in the care of their patients. They must demonstrate honesty and integrity in their schoolwork and in their relationships with faculty, staff, administrators, and classmates. They must always demonstrate the emotional stability to be able to exercise good judgment and carry out prompt completion of all the responsibilities attendant to the diagnosis and care of their patients, and in their course work, in a sensitive and effective manner in the role as nursing student. This sensitivity includes self-examination of personal attitudes, perceptions, and stereotypes to avoid potential negative impact on relationships and patient care. Applicants and students must be able to adapt to changing environments, display flexibility and professional responsibility to their patients, peers, faculty, staff, and administrators, and to learn to function in an environment of uncertainty, in which changes may occur rapidly and without warning. A candidate and student must be able to accept and integrate evaluative feedback and respond by a positive modification of behavior. A candidate and student must use conflict resolution strategies effectively in university settings, and in on and off campus clinical learning settings.

STANDARDS OF PROFESSIONAL CONDUCT

Students in the Lienhard School of Nursing are required to adhere to the same high ethical and professional standards required of licensed nurses and nurse practitioners. The Code of Ethics for Nurses promulgated by the American Nurses Association applies to all students in the Lienhard School of Nursing. The American Nurses Association's Code of Ethics for Nurses is supplemented by the Code of Ethics for Nurses with Interpretative Statements (2015). Also promulgated by the American Nurses Association and applicable to all Lienhard School of Nursing students are the expectations of the professional role of a registered nurse which are identified and discussed in Nursing: Scope and Standards of Practice (4th edition, 2021) published by the American Nurses Association. Students are encouraged to have their own copy of Nursing: Scope and Standards of Practice, however copies are available for review in the Lienhard School of Nursing Office of Academic Affairs on the New York and Pleasantville campuses, and they are on reserve in the Edward and Doris Mortola Library and the Henry Birnbaum Library.

In addition to their responsibility to comply with the American Nurses Association's Code of Ethics for Nurses and Nursing: Scope and Standards of Practice, Lienhard School of Nursing students also are required to comply with, among other things, the policies and practices of the University (including, but not limited to, the University's Guiding Principles of Conduct which may be found in the Pace University Student Handbook, the Lienhard School of Nursing, and each clinical site to which a student is assigned.

The compliance procedure applicable to the Standards of Professional Conduct is set forth in the Lienhard School of Nursing Professional Conduct Compliance Policy, which follows.

Revised September 1, 2021

Standards of Professional Conduct Compliance Policy

Violating the Standards for Professional Conduct is grounds for disciplinary action. Examples of such conduct includes, but not be limited to: falsifying documents, unauthorized access of clinical information, unauthorized ordering or prescribing of medications, unauthorized use of the placement site's electronic resources for personal business, sleeping while in the clinical placement site, presenting to clinical setting while chemically impaired, use of abusive or inappropriate language in the placement site, excessive unauthorized lateness, leaving the clinical site early without approval of the faculty or assigned supervisor. While determining whether a student violated the Lienhard School of Nursing's Standards of Professional Conduct, the instructor shall meet with the student to discuss the matter, to obtain any relevant information from the student, and to permit the student to present further

information regarding the case. If an instructor determines that it is more likely than not that a student violated the Standards of Professional Conduct, the instructor may impose sanctions such as, but not limited to, a reduction in the grade or a failing grade for an assignment or examination; and/or a failing grade for the course in which the violation occurred; and/or requiring the student to complete a learning intervention designed to increase the student's awareness of the significance and consequences of the violation.

Ordinarily, within five business days of making the determination of whether there was a violation and imposing the sanction, if any, the instructor shall report in writing to the graduate department chair (Chair) that the instructor determined the student violated the Standards of Professional Conduct. The report shall (i) provide the relevant details about the violation; (ii) describe the instructor's investigation and the basis of the finding that the student violated the Standards of Professional Conduct; (iii) identify the sanction(s) imposed; and (iv) include any relevant documents. A copy of the report shall simultaneously be provided to the student and the associate dean, interim.

The student may appeal the finding of a violation of the Standards of Professional Conduct and/or the sanction imposed to the Chair. The appeal must be submitted in writing to the Chair within five business days of the date on which the instructor's report was issued to the student. If the appeal to the Chair is not submitted within five business days, ordinarily the appeal shall be denied. If the instructor who found the student violated the Standards of Professional Conduct is also the Chair, the appeal must be submitted to the associate dean, interim.

The Chair may conduct a further investigation as appropriate under the circumstances. The instructor's finding of a violation and/or the sanction imposed will be affirmed unless the Chair determines there is no rational basis for the finding and/or the sanction, as the case may be. If such occurs, the Chair will confer with the instructor and request that the instructor review the matter and, if the instructor concludes it is appropriate, to vacate or modify the finding of a violation of the Standards of Professional Conduct and/or the sanction imposed. If the instructor does not conduct a review, the Chair will request that at least one other instructor review the basis of the finding that the student violated the Standards of Professional Conduct and/or the sanction. During the period the matter is being reviewed by another instructor, the course instructor may vacate or modify their finding of a violation and/or any sanction imposed.

Under certain circumstances, the Chair may impose sanctions in addition to those imposed by the instructor. For example, if previous reports show that the student has violated the policy currently at issue, or if the current violation is a significant one (e.g., patient information was falsified and consequently the safety and well-being of the patient were jeopardized; the violation jeopardized the relationship of the Lienhard School of Nursing with a clinical site), the Chair may impose additional sanctions up to and including suspension and dismissal from the Lienhard School of Nursing. Before imposing a sanction of suspension or dismissal, the Chair shall meet with the student to discuss the matter, to obtain any additional relevant information, and to permit the student to present information regarding the case. A written copy of the Chair's decision shall be provided to the instructor and the student as soon as practicable.

Students found to have violated the Standards of Professional Conduct and were sanctioned by the Chair with suspension or dismissal from the Lienhard School of Nursing, may appeal the decision to the associate dean, interim¹. The appeal must be submitted in writing to the associate dean, interim within five business days of the date on which the Chair's decision is issued to the student. If the appeal to the associate dean, interim is not submitted within five business days, ordinarily the appeal shall be denied.

The associate dean, interim will review the report from the course instructor, the Chair's decision, and the student's appeal to the instructor and to the Chair, and such other information the associate dean, interim believes is relevant to the matter. The associate dean, interim will affirm the decision of the Chair unless the associate dean, interim determines there is no rational basis for the Chair's decision.

¹ Ordinarily, the sanctions of suspension and dismissal will not be implemented until the appeal has been completed.

A written copy of the associate dean, interim's decision shall be provided to the Chair and the student as soon as practicable. The associate dean, interim's decision is final and not subject to further review.

Effective September 2017; revised September 2020

ACADEMIC POLICIES OF THE LIENHARD SCHOOL OF NURSING

Grade Appeal Process, Step-by-Step

The process for appealing a grade in a nursing course is governed by the University's Grade Appeal Process (a copy of which may be found in the on-line Pace University Student Handbook) and this Grade Appeal Process: Step-by-Step, both of which provide that only the final course grade may be appealed. Therefore, a student may not use the Grade Appeal Process to appeal a grade for an examination, assignment, paper and the like; only a final course grade may be appealed. The procedure described below is intended to facilitate a student's understanding of the Grade Appeal Process and to identify the steps that must be followed.

Students are responsible for knowing and complying with the Grade Appeal Process of both the University and the Lienhard School of Nursing.

- Step 1 Before appealing a final nursing course grade, the student should review and become familiar with the Grade Appeal Process of the University and this Grade Appeal Process: Step-by-Step.
- Step 2 At the sole discretion of the Doctor of Philosophy in Nursing Department Chair (Chair) the student may be permitted to register for and attend certain nursing courses while the student's grade appeal is pending (ordinarily, such nursing courses are those courses for which the failed course is a prerequisite). The Chair's approval must be in writing. Continued enrollment is subject to the decision of the grade appeal. If the grade appeal is not granted, effective immediately, the student will no longer be permitted to attend the classes for which approval to attend was given, no grades or credit will be given for those courses and the student's registration for those courses shall be voided.
- Step 3 If a student believes that the final grade received in a nursing course does not reflect "reasonable and generally acceptable academic requirements," the student must, within 10 business days from the date on which the student knew or should have known about the final nursing course grade, arrange to meet with the instructor who issued the grade. The purpose of this meeting is to provide clarification about the method by which the grade was determined and, if possible, to resolve the issue.
- Step 4 If the student and the instructor are unable to resolve the issue and the student wishes to continue the grade appeal, the student may appeal the final nursing course grade to the Chair. The grade appeal must be submitted in writing to the Chair within 5 business days from the date on which the student was informed of the decision of the course instructor and must clearly state the basis for challenging the grade received for the nursing course. The student must also forward a copy of their written grade appeal to the instructor who issued the final grade being challenged. If the Chair is the instructor who issued the grade being appealed, the grade appeal must be submitted to the undergraduate or graduate department chair. All grade appeals must be completed before the Academic Progression Appeals Committee will accept a student's appeal of the decision dismissing the student from the nursing program in which he or she is enrolled (See Appeal of Academic Dismissal Policy).
- Step 5 If after submitting their written appeal the student wishes to meet with the Chair responsible for the grade appeal to discuss it, the student must contact the department's program coordinator to make an appointment.

- Step 6 The Chair will decide whether the final nursing course grade should be reviewed further. The Chair's decision of whether to have a grade reviewed is final and may not be appealed. If the Chair decides that the method by which the student's grade was determined was not proper and that the final nursing course grade will be reviewed, the procedure for reviewing the grade described in the University's Grade Appeal Process will be implemented. The Chair will notify the student in writing whether the grade will be reviewed further.
- Step 7 If the grade is subject to further review, the Chair will notify the student in writing of the result of the review.

Revised September 1, 2016; revised 2021

Academic Probation Policy

The academic standards of the Lienhard School of Nursing (LSN) are established by the LSN faculty and are intended to be consistent with the policies and practices of Pace University. Usually, LSN students who fail to satisfy the academic standards of the LSN program in which they are enrolled will be placed on academic probation. Under certain circumstances, however, students who fail to satisfy the applicable academic standards will be dismissed from the LSN program even though they previously were not on probation. (See Academic Dismissal Policy.) The purpose of academic probation is to give students an opportunity to improve their academic performance and to meet the applicable academic standards. Students who satisfy the conditions of probation in the time permitted will be returned to the status of good academic standing and be eligible for enrollment in their LSN program. Students who fail to satisfy the conditions of probation within the time permitted will be dismissed automatically from the LSN program in which they are enrolled and, if they are not eligible to transfer to another LSN program, from the Lienhard School of Nursing.

The following section provides (1) the academic standards of the Doctor of Philosophy in Nursing Department, (2) conditions that will result in the PhD student being placed on academic probation, and (3) the conditions of probation that must be satisfied in order for the student to return to good academic standing, making satisfactory progress.

In addition to the academic standards and conditions of probation, the following conditions apply:

- A student who fails to satisfy the applicable academic standards and is placed on probation will be on probation for one semester (the "Probationary Semester").
- Normally the Chair would inform students in writing if the student failed to satisfy the applicable academic standards and has been placed on probation. Probation is automatic if a student fails to satisfy the applicable academic standards and, therefore, is not contingent upon receipt of such notification. It is the student's responsibility to verify their academic standing before each semester and to make inquiries in the Lienhard School of Nursing Office of Academic Affairs if clarification is needed.
- The Probationary Semester will be the first semester in which the student is enrolled, following the semester in which the student failed to satisfy the academic standards.
- Neither the status of probation nor the conditions of probation may be appealed.
- The conditions of probation must be satisfied by the conclusion of the Probationary Semester.
- If a student fails to satisfy the conditions of probation by the conclusion of the Probationary Semester, the student will be dismissed automatically from the Doctor of Philosophy in Nursing Department and from the Lienhard School of Nursing.

- A student who has successfully completed one prior Probationary Semester and their current academic performance would warrant a probationary status, the student will be dismissed automatically from the LSN Doctor of Philosophy of Nursing Department and the Lienhard School of Nursing.

Academic Standards: Doctor of Philosophy in Nursing Department (PhD)

The passing grade for a PhD course is C+ (2.3 on 4.0 scale). A cumulative GPA of 3.0 (on a 4.0 scale) or better is required to remain in good academic standing.

Satisfactory Progression

A student is deemed not to be making satisfactory progress if he or she has:

1. Completed 27 credits and has not passed the qualifying examination.
2. A grade point average below 3.00.
3. Been enrolled for 12 semesters without passing the Dissertation Proposal Defense.
4. Not completed his or her degree in six years.

Academic probation occurs whenever a PhD student earns a grade of less than C+ in a course or attains a cumulative grade point average of less than B (3.0). A PhD student who earns a course grade of less than C+ will be placed on academic probation until a grade of C+ or better is achieved in that course. A PhD student may only repeat a course once. Two grades of less than C+ in the same course or achieving less than a C+ in two different courses, will result in automatic dismissal.

PhD students who fall below a grade point average of 3.0 are placed on academic probation for one semester. If the student's performance does not improve during that semester, the PhD Department Chairperson will decide whether to dismiss the student or to allow the continuation of the academic probation. If at the end of the second semester the grade point average is still below 3.0, the PhD student may be advised to withdraw or face dismissal. A grade point average of 3.0 is necessary for graduation from the PhD program².

Assignments

Unless the instructor has given prior approval for another date, all assignments must be submitted on or before the date they are due. Failure to do so may result in a reduction in the grade or a failing grade for the late assignment.

Students are not permitted to submit additional work, repeat examinations, or revise and resubmit graded assignments in an effort to raise their grade.

² The minimum passing grade for each of the Lienhard School of Nursing programs may be found in the Academic Probation Policy, Dismissal from the Doctor of Philosophy of Nursing Department. Dismissal is automatic if a student meets the criteria for automatic dismissal and therefore is not contingent upon receipt of such notification. It is the student's responsibility to verify their academic standing before each semester and to make inquiries in the Lienhard School of Nursing Office of Academic Affairs if clarification is needed.

A student who has been dismissed from the Doctor of Philosophy program in the Nursing Department and, if applicable, the Lienhard School of Nursing, may appeal the decision of dismissal to the Academic Progression Appeal Committee in accordance with the procedure set forth in the Lienhard School of Nursing Appeal of Academic Dismissal Policy. A student may, at the sole discretion of the Chairperson be permitted to register for and attend class while the student's appeal to the Appeals Committee is pending. Such approval must be in writing. If the appeal is not granted, effective immediately the student will no longer be permitted to attend class, no grades or credit will be given for the classes attended while the appeal was pending, and the student's registration shall be voided.

Examinations

Students are expected to take course examinations as scheduled. If a student emergency or unresolvable conflict occurs that prevents the student from taking a scheduled examination, the student must follow the procedures below regarding conflict, deferred, or make-up examinations, respectively.

Students unable to take a final examination as scheduled due to a conflict may take a conflict examination. A conflict consists of two final examinations scheduled at the same time or three final examinations scheduled on one day. As soon as the conflict is known, students must make arrangements to take a conflict examination.

Students who are unable to take a final examination as scheduled due to an emergency, may, at the discretion of the instructor, take a deferred examination. Students must notify the instructor as soon as possible that due to an emergency (e.g., serious illness) they are unable to take the examination as scheduled. Only if the instructor approves, may a student take a deferred examination. A fee is charged for a deferred examination.

The necessary forms for conflict and deferred examinations may be obtained in the Lienhard School of Nursing Office of Academic Affairs. The University's Center for Academic Excellence administers conflict and deferred examinations.

If, due to an emergency, a student is unable to take an examination that is not a final examination (e.g., a mid-term examination), the student must notify the instructor as soon as possible and request a make-up examination. The decision of whether to permit a make-up examination is at the discretion of the instructor. No fee is charged for a make-up examination.

At the discretion of the instructor, the format of a make-up, conflict, and deferred examination may differ from the format of the original examination. Students are permitted to take an examination only once and no examination may be repeated.

Revised September 1, 2008

Incomplete Work

Information about course grades when course work is incomplete at the end of the semester may be found in the Academic Policies and General Regulations section of the Pace University Graduate [Catalog](#).

Official PhD Student Signature

Students are expected to use their name and "PhD in Nursing Student Pace University" as their official signature while in the program. Use of the designation PhD (c) is not acceptable. Use of the designation PhD may only occur after the student has successfully defended their dissertation and their degree has been conferred.

ACADEMIC DISMISSAL POLICY³⁴

Before being dismissed from a Lienhard School of Nursing (LSN) PhD program or department for failing to satisfy the applicable academic standards, usually a student will be placed on academic probation for one semester (the “Probationary Semester”, see Academic Probation Policy.) There are circumstances, however, when a student will not be placed on academic probation and instead will be dismissed from the LSN graduate program and the Lienhard School of Nursing. The circumstances that will result in automatic dismissal rather than probation include, but are not limited to, the following:

- Students who fail two nursing courses, whether the same or different nursing courses, will be dismissed automatically from their respective program and the Lienhard School of Nursing.

As soon as practicable after the conclusion of the fall and spring semesters and the first and second summer sessions, the chairperson will review the status of each student enrolled in a PhD program (1) to identify those students who meet any of the circumstances identified above that result in automatic dismissal, and (2) to determine whether students who were on academic probation in the previous semester satisfied the conditions of probation by the conclusion of the Probationary Semester. Students who satisfied the conditions of academic probation by the conclusion of the Probationary Semester will be restored to good academic standing and be eligible for enrollment in their LSN program.

Normally, students who are dismissed from the Doctor of Philosophy program will be informed in writing by the chair as soon as practicable.

Revised November 15, 2017; revised September 1, 2019

Appeal of Academic Dismissal Policy

Students who have been dismissed from the Lienhard School of Nursing (LSN) program in which they are enrolled and, if applicable, the Lienhard School of Nursing, may appeal the decision of dismissal to the Appeals Committee, (see *Academic Probation Policy* and *Academic Dismissal Policy*). To initiate such an appeal, the student must deliver a written appeal by overnight mail or personal delivery addressed to the

Chair, Academic Progression Appeals Committee
c/o Staff Associate for Appeals
Office of Academic Affairs
Lienhard School of Nursing
861 Bedford Road
Pleasantville, New York 10570

Alternatively, the written appeal may be sent as an email attachment to the chair of the Academic Progression Appeals Committee in care of nursingappeals@pace.edu. The written appeal must be received by the Appeals Committee within 14 calendar days from the date of the letter informing the

³ For purposes of the Academic Dismissal Policy, except as otherwise noted, the term “nursing course” includes required and elective nursing courses.

⁴ The minimum passing grade for each of the Lienhard School of Nursing programs may be found in the Academic Probation Policy, Dismissal from the Doctor of Philosophy in the Nursing Department. Dismissal is automatic if a student meets the criteria for automatic dismissal and therefore is not contingent upon receipt of such notification. It is the student’s responsibility to verify their academic standing before each semester and to make inquiries in the Lienhard School of Nursing Office of Academic Affairs if clarification is needed.

A student who has been dismissed from the Doctor of Philosophy program and, if applicable, the Lienhard School of Nursing, may appeal the decision of dismissal to the Academic Progression Appeal Committee in accordance with the procedure set forth in the Lienhard School of Nursing Appeal of Academic Dismissal Policy. A student may, at the sole discretion of the Chairperson be permitted to register for and attend class while the student’s appeal to the Appeals Committee is pending. Such approval must be in writing. If the appeal is not granted, effective immediately the student will no longer be permitted to attend class, no grades or credit will be given for the classes attended while the appeal was pending, and the student’s registration shall be voided.

student of their academic dismissal. If the appeal is not received by the Appeals Committee on or before the fourteenth day, normally the appeal will be denied.⁵

Standard for Granting an Appeal

An appeal will be granted only if the student demonstrates to the satisfaction of the Appeals Committee that the student's unsatisfactory academic performance is due to (1) extraordinary and (2) non-recurring circumstances and (3) is not representative of the student's academic ability.

All grade appeals must be completed before the Appeals Committee will accept a student's appeal of the decision dismissing the student from the nursing program in which he or she is enrolled. An appeal of the decision dismissing the student from a nursing program must be received by the Appeals Committee within fourteen (14) calendar days from the date of the decision of the grade appeal.

Information Required for an Appeal.

The written appeal submitted by the student must include the following information:

1. The name, telephone number, address and e-mail address of the student appealing the decision of dismissal; and
2. The name of the LSN program from which the student was dismissed and confirmation of whether the student was dismissed also from the Lienhard School of Nursing; and
3. The reason the student was dismissed from the LSN program and, if applicable, the Lienhard School of Nursing; and
4. Identification of the (a) extraordinary and (b) non-recurring circumstances that caused the student's unsatisfactory academic performance and subsequent dismissal from an LSN program; and (c) evidence that the unsatisfactory academic performance is not representative of the student's academic ability; and
5. An explanation of why the information provided in Paragraph 4 above should result in the reversal of the decision to dismiss the student from the LSN program and, if applicable, the Lienhard School of Nursing; and
6. A copy of the student's dismissal letter from the Doctor of Philosophy in Nursing Department and/or the Lienhard School of Nursing; and
7. A statement that no grade appeals are pending or will be commenced after the appeal of the decision to dismiss has been submitted to the Appeals Committee with respect to grades issued that resulted in the student being dismissed.

The Appeals Process

The Appeals Committee will meet as soon as practicable after the fall and spring semesters and each of the summer sessions to hear appeals of academic dismissals. The Appeals Committee will also meet at such other times as may be reasonably necessary.

In addition to considering the student's written appeal, ordinarily the Appeals Committee will require the student to appear at a hearing in order to, among other things, answer any questions the Appeals Committee may have or to provide additional information. At the hearing before the Appeals Committee, the student may present additional supportive evidence of their appeal. As part of its deliberations, and at its sole discretion, the Appeals Committee may, among other things, take into consideration the student's academic record, request relevant information from faculty members concerning the circumstances that gave rise to the dismissal, and request information from persons knowledgeable about other issues before the Appeals Committee. The student will be permitted to

⁵ The grade for the nursing course may be appealed in accordance with the Grade Appeal Process: Step-By-Step Policy.

respond to such information if it is averse to the student and the Appeals Committee is likely to rely on it in making their decision. No advisors or representatives of the student may participate in the hearing before the Appeals Committee or the business of the Appeals Committee. Such advisors and representatives include, but are not limited to, attorneys, representatives, friends, classmates, and family members of the student.

If the appeal is granted, the student will be reinstated in an appropriate Lienhard School of Nursing program and the Lienhard School of Nursing, as the case may be, and placed on academic probation in accordance with the applicable conditions of probation set forth in the Academic Probation Policy. (See Reinstatement After an Appeal below.) If the appeal is denied, dismissal from the LSN program and, if applicable, the Lienhard School of Nursing will be effective as of the last day of the semester in which the student was on probation or was enrolled immediately prior to being dismissed.

The decision of the Appeals Committee requires a majority vote and is final and not subject to further review. The student will be notified of the decision of the Appeals Committee in writing as soon as practicable, usually within fifteen (15) business days following the date on which the Appeals Committee made its decision.

Reinstatement After an Appeal

A student whose appeal is granted will be reinstated in the appropriate LSN program and the Lienhard School of Nursing, as the case may be, on academic probation in accordance with the applicable conditions of probation set forth in the Academic Probation Policy. A student who is reinstated and fails to satisfy the conditions of academic probation within the time permitted, will be dismissed automatically from the Lienhard School of Nursing. If such occurs, ordinarily the dismissal will be final, and the student will not have the right to any further review or appeal.

The Academic Progression Appeals Committee

The Appeals Committee consists of five full-time faculty members of the Lienhard School of Nursing, only three of whom ordinarily will hear a student's appeal. A member of the Appeals Committee who was a participant in the circumstances that gave rise to the student's unsatisfactory academic performance and/or subsequent dismissal, must be recused from the Appeals Committee for the sole purpose of that student's appeal.

Revised September 1, 2009

ACADEMIC INTEGRITY

The most important rules of academic honesty are fundamental in the pursuit of knowledge and follow inevitably from a respect for commitment to the principles of truth. Pace University's Academic Integrity Code requires students to accept responsibility for being honest and to respect ethical standards in meeting their academic assignments and requirements. For additional information, see the [University Academic Integrity Code](#) and the [University Policies, Disciplinary, and Grievance Procedures](#).

Integrity in the academic environment requires students to demonstrate intellectual and academic achievement independent of all assistance except that authorized by the course instructor. Therefore, students must always respond truthfully to faculty and credit must only be taken for research, ideas, or words that are original to the student. All data on academic or clinical assignments, client records, or results of research must be the student's own work or must be properly referenced. Students must never present any work under false pretenses. The [Pace University Academic Integrity Code](#) prohibits all forms of academic dishonesty and misconduct and provides non-exclusive illustrative examples of the kinds of conduct that are prohibited, including, cheating, fabrication, helping others to violate the Academic Integrity Code, plagiarism, misrepresentation, unauthorized possession or use of academic materials, unauthorized communication, forgery or alteration, theft or destruction of academic materials, submitting duplicative work, acts that are harmful to other students, and making false statements to faculty, administrators or the Academic Conduct Committee regarding a possible code violation. Students are responsible for familiarizing themselves with the Academic Integrity Code of the University.

Academic Integrity Code Procedure

[Pace University's Academic Integrity Code](#) outlines the Direct Resolution and Academic Conduct Committee hearing procedures by which the University determines whether a student violated the Academic Integrity Code. If the violation is addressed through Direct Resolution, sanctions that may be imposed include, but are not limited to a reduction in the grade or a failing grade for the paper, report, examination, data compilation, presentation or other assignment; and/or a failing grade for the course in which the violation occurred; and/or requiring the student to complete a learning intervention designed to increase the student's awareness of the significance and consequences of the violation. If the matter is referred to the Academic Conduct Committee and it is determined that the violation occurred by a preponderance of the evidence, depending on the severity of the violation, sanctions that may be imposed include, but are not limited to file notation, reprimand, academic disciplinary probation, suspension or expulsion from a program and/or the University. Additional sanctions may be imposed including financial aid from the University may be withdrawn, a previously granted degree may be revoked, and the Committee Chair may submit a written recommendation to a course instructor regarding a student's grade. The Academic Integrity Code requires that all violations be documented and reported to the Chair of the PhD program and the Chair of the University's Academic Conduct Committee. Without limiting the University's discretion to impose a severe sanction for any single Code violation, students found to have committed multiple violations of the Academic Integrity Code will generally be subject to more severe sanctions.

If a student is not satisfied with the resolution of an academic integrity violation, the student may follow the appeal process as outlined in the University's Academic Integrity Code.

Effective September 1, 2021

ACADEMIC AND ADVISING GUIDELINES

General Advising Principles

All students enrolled in the Doctor of Philosophy in Nursing (PhD) Department are assigned to a PhD faculty member, who serves as their advisor.

Academic Advising Responsibilities of Doctor of Philosophy of Nursing Students

Students must coordinate and meet with their academic advisor at least once a semester. During this time, students must update the Advisement Form (Appendix (A)). It is during this advisement that faculty assess the student's current academic performance and progression in the program.

During the first semester of the first year, incoming doctoral students are advised by the department chairperson. Based on the student's expressed research interests during their in-person interview, a notation is made in the student's file regarding a "good fit" for an advisor. The students are then assigned and notified by the department chairperson who their faculty advisor is for the second semester of the first year. This faculty advisor may or may not serve as the mentor for the Qualifying Exam.

Once a faculty member is selected, the department chairperson will review and approve the selection in consultation with the PhD Leadership Committee and the selected faculty member. This faculty member may become the chair of the dissertation committee and/or acts as their advisor and mentor until the chair is selected.

Students must meet with their faculty advisor each semester to review their progress. The Advisement Form (Appendix (A)) reflects the discussions and decisions agreed upon at the time of advisement and is placed in the student's file.

Student assignments to a faculty advisor may be changed with permission and approval of the department chairperson and mutual consent of the faculty advisor. Such changes encompass all aspects of the advising role.

The student's assigned faculty advisor will also be available to serve as teacher and mentor for students who are meeting and exceeding academic and professional development outcomes and for those demonstrating problems in either academic or professional areas. Student issues that involve personal or emotional counseling beyond the traditional advising will be referred to the Counseling Center.

Students may also seek informal advising from other nursing faculty members. When this occurs, the faculty members may refer the student to their primary advisor if follow-up is necessary.

Timeline for Identifying Advisors and Dissertation Chairs

First Year

Fall semester

A faculty advisor is assigned to each student during orientation. The faculty advisor is selected based on the student's area of interest.

Spring semester

- Students meet with their assigned faculty advisor to discuss progression and guidance.
- Students complete a questionnaire identifying their research interest/or phenomenon to support their work on the Qualifying Exam. (Students will work with their advisor during this process.)

Second Year

Fall semester

- Students complete Qualifying Exam over the course of the fall semester as a part of NURS 927 with guidance from course faculty of NURS 927 and their advisor.
- Students will work with their advisor to complete the annual Advisement Form Appendix (A).
- Students will begin the process of determining who the Chair of the Dissertation will be. This Chair of the Dissertation (Chair) may be their advisor or another faculty whose interests are more closely aligned with that of the students' research.

Spring semester

- In NURS 928 Dissertation Development I students select a Chair for their Dissertation Committee and complete the Dissertation Topic and Committee Chairperson Selection form (Appendix B).

Summer (between 2nd and 3rd year)

- Students work independently on their dissertation proposal, checking in with the Chair at the discretion of the Chair.

Third Year

Fall Semester

- Students will work with their advisor to complete and update the annual Advisement Form (Appendix A).
- The student, in collaboration with their dissertation committee chairperson selects the committee members and completes the Dissertation Committee Selection Form (Appendix C).
- Students are enrolled in NURS 938 Dissertation Development II. By the end of the fall semester, students should have completed the dissertation proposal defense (Appendix D, Appendix E).

Spring Semester

- Students who have not completed and defended their dissertation proposal must register for NURS 948 Dissertation Development III and continue to register for Dissertation Development III until they have completed and defended their dissertation proposal.
- Students who have successfully defended their Dissertation Proposal will register for Matriculation Maintenance (MM) until they have successfully defended their dissertation. PhD students are expected to maintain continuous involvement and enrollment in the program. Failure to register for any period constitutes a de facto withdrawal. Students who do not maintain matriculation and wish to resume study must apply for readmission. Readmission is granted only on the recommendation of the PhD Department chair and the approval of the associate dean, interim.
- Students will obtain IRB approval and collect the data and work on the completion of the dissertation. They will work with the chair of the Dissertation Committee in completing this work.
- Students will file for graduation after they have successfully defended their dissertation proposal.

Summer (between 3rd and 4th year)

- Students will continue to work on collection of data and the completion of the dissertation.

Fourth Year

Fall Semester

- Completion of the Dissertation

Spring Semester

- Completion of Dissertation and dissertation defense (Appendix G and Appendix H)

Independent Study

If you plan to register for independent study, you must contact the instructor/supervising faculty and fill out the Independent Study Form (see Appendix F). The form must be signed by both the student and the supervising faculty and submitted to the PhD Program Coordinator for approval by the Chairperson and the Associate Dean, Interim. The PhD Program Coordinator will then give the student permission to register for the course.

Transfer Credits

With the prior approval of the Program Director, the Lienhard School of Nursing will accept up to a maximum of six (6) credits for certain nursing courses taken at other institutions by students who have matriculated into the Lienhard School of Nursing Master of Science programs.

Revised September 1, 2016

COURSE OF STUDY

The doctoral curriculum consists of a minimum of 45 post-master's credits. There are 21 credits in research methods, 18 credits in substantive nursing, 9 credits in health care and policy studies, and 6 credits of dissertation seminar (another 3 credits if needed). This curriculum design is consistent with the standards of research doctorate education in nursing. There are no courses with a clinical practice component but there is a research practicum.

Curriculum Content Areas for the PhD in Nursing

Research Methods (21 credits)

- Quantitative Research Methods I (3 credits)
- Quantitative Research Methods II (3 credits)

- Qualitative Research Methods I (3 credits)
- Strategies for Advanced Scientific Writing (3 credits)
- Measurement in Nursing Research (3 credits)
- Research Practicum (3 credits)
- Research Methods Elective: Quantitative Research Methods III or Qualitative Research Methods II (3 credits)

Substantive Nursing (18 credits)

- Philosophy of Science (3 credits)
- Advanced Nursing in Primary Health Care (3 credits)
- Development of Nursing Knowledge (3 credits)
- Health Care Policy: Strategic Action (3 credits)
- Teaching and Learning in Academic Settings (3 credits)
- Interprofessional Approaches to Research (3 credits)

Dissertation Development Seminars (6 credits minimum)

TOTAL: 45 credits minimum

Doctoral Practicum in Nursing Research (NURS 925)

The doctoral research practicum focuses on the students' development of selected research skills in collaboration with their Practicum Course faculty. The practicum placement is made with an appropriate Research Practicum Mentor (researcher, clinician or educator) who is conducting ongoing research. The array of activities may include, but are not limited to, helping to develop a research proposal, (other than one's own) and/or submitting such a proposal as part of a grant application, preparing a protocol for submission to the institutional review board, assisting with recruitment or data collection for ongoing

investigation, learning data management skills, participating in performance of laboratory procedures, participating in research team meetings, conducting literature searches for ongoing research projects, and preparing abstracts and/or manuscripts for presentation and publication.

The research process is complex, and coursework provides the student only with a theoretical understanding of that process. The integration of research concepts and their applications, however, can only be achieved through practical experience. The research practicum provides the student with a chance to experience the research process on a day-to-day basis and helps the student to integrate and apply theoretical knowledge.

The course faculty meets students in the fall semester prior to the spring semester to discuss the practicum requirements. During the fall semester, the student must complete the Pace University CHP Health Clearance requirements. In addition, once the placement is assigned, the student must determine and complete any additional health or clearance requirements of the assigned institution. The practicum may continue into the summer as needed with approval of the PhD Chairperson and the course faculty member.

Academic Progression

Qualifying Exam

Once 18 credits of coursework are completed (or the first two semesters), students will take the Qualifying Examination during the fall semester of the second year. The Qualifying Examination is developed as a part of NURS 927, Strategies for Advanced Scientific Writing. The exam will consist of a written State of the Science integrative review of the scientific literature related to the student selected topic of interest and approved by their faculty advisor who is a tenured or tenure track faculty in LSN. The purpose of the Qualifying Exam is to determine the student's ability to: 1. demonstrate a broad mastery of core content, theory, and research in a discipline; 2. select an appropriate phenomenon for an integrative literature review; 3. critically appraise empirical and conceptual literature of the selected phenomenon using articles, books, and/or dissertations; 4. Undertake independent scholarship. The Qualifying Exam is scored as P/F using the qualifying exam grading rubric (Appendix I). The qualifying exam is graded by two tenured or tenure track LSN faculty. If there is a discrepancy between the grading of the two graders a third tenured or tenure track LSN faculty member grades the exam and breaks the tie. The grade on the Qualifying Exam is not subject to appeal; the grade is final.

If the Qualifying Exam is not passed the first time it is taken, the student will consult with their faculty advisor. If the student wishes to continue in the program, they must register for a 1 credit Independent Study for the winter intersession. The purpose of the one credit independent study is to provide faculty support during the rewriting process. The student will have one additional opportunity to rewrite the exam prior to the beginning of the spring semester. A pass on the second attempt is a requirement for remaining in the program. Failure to successfully pass the qualifying exam on the second attempt will result in dismissal from the Doctor of Philosophy program in the Nursing Department. Students who are dismissed from the Doctor of Philosophy program in the Nursing Department for failure of the qualifying exam are not eligible for readmission.

The grading procedure of the second qualifying examination will use the same process as described above for the first attempt. The grade on the Qualifying Exam is not subject to appeal; the grade is final.

A student must be registered for Fall Semester year II in order for their qualifying exam to be graded.

DISSERTATION PROCEDURES

Dissertation Research Overview

Students are required to complete a dissertation research study that addresses a particular nursing and health disparities issue. Dissertations may be qualitative, quantitative, or multi- methods and must meet rigorous standards of research and scholarship. All dissertations are expected to incorporate the theoretical context for the research, development of research methods employed,

findings, and implications for nursing research, nursing practice and may include implications for education, quality and safety, and health services research.

Students are encouraged to select a dissertation topic that analyzes a specific nursing issue. Prior to and during the dissertation seminars, the student should crystallize the dissertation topic. This involves the identification of a topic and the elaboration of ideas and methods that will result in a dissertation proposal. Deciding on a topic and finding within this topic a delimited manageable area for research is rarely simple. One needs to read widely in the literature to decide what is already known and what is not, and where new contributions to knowledge can be made.

Students are encouraged to brainstorm and obtain the widest possible range of advice from faculty and student colleagues in this initial phase. This includes searches for existing datasets or obtaining access to external research sites.

Dissertations are designed by students with the guidance of their faculty advisor, who becomes the Dissertation Committee Chairperson, once the qualifying exam has been passed. The dissertation must be original research. This may involve a study initiated and conducted entirely by the student; a secondary analysis of an existing data set; or be based on a study led by a senior investigator. Whatever the origins of the research study, all research questions and analyses in the dissertation must reflect original work by the doctoral student under the guidance of their chairperson.

The steps in the dissertation process involve the following: (note each step is discussed in detail following this outline)

1. Assignment of an advisor
2. Approval of the topic and dissertation chairperson
3. Formation and approval of the dissertation committee
4. Development of a written dissertation proposal approved by the dissertation committee
5. Approval of oral defense of proposal
6. IRB approval
7. Dissertation research
8. Writing of the formal dissertation with the guidance of the dissertation committee
9. Approval of the written dissertation from the full dissertation committee
10. Successful oral defense of the dissertation
11. Dissertation deposit according to Doctor of Philosophy in Nursing Department Guidelines

While students are strongly encouraged to complete their degrees within four years of matriculation, the PhD Nursing Program requires the degree to be completed no later than six years after matriculation.

Doctoral Dissertation Committee

Parallel to developing a dissertation topic is the search for suitable individuals to guide the research and serve on the dissertation committee. Once the dissertation topic has been developed, the student selects a Dissertation Chair. The proposed chair signs the Dissertation Topic Committee Chair Selection Form (Appendix B) and submits it to the Chairperson of the Doctor of Philosophy in Nursing Department. The role of the dissertation committee is to provide feedback on the dissertation proposal, examine the candidate in an oral defense of the proposal and dissertation, and to approve the

completed dissertation. The Chair and the student work together to identify and contact potential committee members to explore their willingness to serve on the dissertation committee.

The proposed committee members are submitted to the Chairperson of the Doctor of Philosophy in Nursing for approval using Dissertation Committee Selection Form (Appendix C). After the student passes the proposal (approved written dissertation proposal and defense), students register for Dissertation Continuation each semester until completion and defense of the dissertation.

The dissertation committee is composed of a minimum of the chair and two additional members. The committee composition must meet the following criteria:

- The dissertation chairperson must be a full-time faculty member of the Pace University nursing faculty tenured or on a tenure track.
- A second dissertation committee member must be a full-time faculty at Pace University in nursing, tenured or on a tenure track.
- A third dissertation committee member must be from outside of the nursing discipline. This member may be a tenured or tenure track faculty from another department at Pace University or from outside of Pace University but with credentials that would be required for appointment to the professorial level at Pace.
- Optional additional members may be included, pending approval by the chair and the chairperson of the Doctor of Philosophy in Nursing Department. The curriculum vitae of proposed dissertation committee members who are not Pace University faculty must be submitted, at the time of committee formation, for review by the chairperson of the Doctor of Philosophy in Nursing Department to ensure that they have the requisite knowledge and credentials to participate as members of the dissertation committee.

The Dissertation Topic and Committee Approval Process

During the course NURS 928 Dissertation Development I, students develop a one-page description of the proposed dissertation topic. The written dissertation topic description should include the dissertation research significance, objectives, research questions, and preliminary methods to be employed. The topic and proposed committee members are submitted to the PhD Program Director for approval using the Dissertation Topic - Committee Chair Selection Form (see Appendix B). The Dissertation Committee Form (Appendix C) must be signed by all members of the dissertation committee and the PhD Chairperson. In the event that a student finds it necessary to change their dissertation committee chairperson, they must first consult with the Chairperson of the Doctor of Philosophy in Nursing Department. If a committee member becomes unavailable to continue serving on the committee, an alternate may be substituted subject to approval by the Committee Chair and Chairperson of the Doctor of Philosophy in Nursing Department.

Doctoral Dissertation Proposal

The proposal must be reviewed and approved by the Dissertation Committee Chair before it is sent out to the dissertation committee for their review and approval. The proposal should be approximately 50 double spaced pages in length plus references, with 1-inch margins and 12-point font. The requirements for the proposal will differ based on the selected methodology, for example, a qualitative versus a quantitative proposal. The Committee Chair is responsible for determining the content of the proposal.

Prior to the oral proposal defense, the written proposal requires approval by the dissertation committee. Each member of the committee approves the proposal by signing the Dissertation Proposal Approval: Written Document (see Appendix D) form, which is then returned to the Program Coordinator. Students must submit the proposal electronically to the dissertation committee 3 weeks before the anticipated oral proposal defense date. Once the full committee has signed the Dissertation Proposal Approval: Written Document form, the student may schedule the oral proposal defense. The student is

responsible for scheduling the oral proposal defense with all committee members arranging for the room with the Nursing PhD Program Coordinator. The dissertation committee will either approve the oral proposal or provide the student with feedback regarding substantive changes. The oral proposal is found to be satisfactory if a majority of the committee vote to accept the oral proposal with no or minimal changes. If there is a tie vote, the chair of the committee will cast an additional vote. If the proposal is found to be satisfactory, the dissertation committee signs the Dissertation Oral Proposal Hearing Report (see Appendix E) listing the dissertation proposal title, the dissertation committee, and the date the committee met with the student. The proposal is then sent to the Chairperson of the Doctoral Program in Nursing and the Program Coordinator with the signed form for final approval. If the proposal is found to be unsatisfactory, the committee will make recommendations to revise the proposal. By agreement of the dissertation committee, the revised proposal is to be submitted either to the committee chair or to the entire committee to assess satisfactory revision of the proposal. In addition, the committee can recommend review and decision by the committee chair alone, by the committee chair and two committee members or review of the proposal and another oral hearing. If the revision is not satisfactory, the dissertation committee chair and Chairperson of the Doctoral Program in Nursing will meet to decide the student's future status in the program. If the proposal is deemed unsatisfactory on the second review, the student is dismissed from the program.

All proposals, regardless of method must be submitted to the Pace University IRB and any other applicable IRB as determined by the location of the proposed research. The student is required to follow all IRB regulations and guidance

The Dissertation Defense

After the written dissertation proposal has been approved and successfully orally defended, the student obtains all necessary IRB approvals, conducts the research and writes the dissertation. It is expected that the student remains in close contact with their chairperson and obtains guidance on a regular basis. When the student and committee chair believe that the student has satisfactorily completed the dissertation, the dissertation is submitted to the committee members for their approval. A Dissertation Evaluation Form (see Appendix G) is sent to each committee member, along with the completed dissertation. The form is filled out and returned to the PhD Program Coordinator no later than four weeks prior to the defense.

The dissertation committee chair and the PhD program coordinator arrange for scheduling the defense in consultation with the student and dissertation committee.

Students must submit an electronic copy of their dissertation at least three weeks before the scheduled defense. The formal oral dissertation defense is conducted with the Dissertation Committee Chair and dissertation committee and is open to the Lienhard School of Nursing Community. At the defense, the student will provide a power point with a brief summary, central themes and findings, and answer questions presented by members of the dissertation committee. Immediately after the oral defense, the dissertation committee will deliberate in private and inform the student of the outcome, which may be passing without revision, resubmission with minor or major revisions, or fail. The Final Dissertation Approval Form (Appendix F) is filled out at this time and signed by all committee members. A dissertation is found to be satisfactory if a majority of the committee vote to accept the dissertation with no or minor changes. The examining committee determines whether the dissertation requires minor or major changes. The differentiation between minor and major changes is determined by the examining committee. If there is a tie vote the chair of the committee will cast an additional vote.

Dissertations with minor revisions are reviewed by the chair for final approval. Dissertations requiring major revisions are reviewed by the full dissertation committee for final approval. If found to be satisfactory, the chairperson will inform the Department Chair in writing that the student has satisfactorily completed the dissertation. If the student receives a failure, the dissertation must be revised, the revisions approved by the committee and a second oral defense scheduled. If on the second defense, the dissertation is deemed unsatisfactory, the student is dismissed from the program.

Formatting and Depositing

All students must submit the final version of the written dissertation, with the required signatures, to ProQuest for publication. Any student who does not submit their written dissertation to ProQuest will not be eligible to earn their diploma.

Submitting to ProQuest and Binding Process

Please see the [Open Educational Resources](#) for additional information.

1. Students are to upload their dissertation to ProQuest. Click here for access to the system. Students are required to submit their dissertation to ProQuest. For more information on copyright, embargoes, and author rights please reach out to Greg Murphy and Noreen McGuire.
 - a. ProQuest processes the digital submission and adds it to the Pace Digital Commons, Dissertations and Abstracts, and Pace Theses and Abstracts which makes it discoverable to other scholars.
 - b. ProQuest can also provide personal bound copies and copyright registration but at added costs.
2. Please mail single-sided copies (at address below) or deliver to the NYC circulation desk (3 hard copies of your dissertation. The three required bound copies are for the department, school, and library. The library will pay for their bound copy but payment must be delivered for the other 2 (\$27.35 per copy.) If you would like to bind personal copies please print out the hardcopies and payment for each copy needed.
3. Make payment by check out to Pace University. Unfortunately, we cannot accept other forms of payment at this time.
4. Please send an email to [Greg Murphy](#) and [Noreen McGuire](#) to confirm the sent or delivered hard copies; you will receive an acknowledgement when they are received at the library if they are mailed.
5. Returns take approximately 30 days once the hard copies are submitted to the bindery; please note that there will be a delay in printing until large orders are compiled to send to the bindery, making the pricing more affordable. This can sometimes take several months.

Mail to:
Attn: Wanda Castener
Henry Birnbaum Library
One Pace Plaza
New York, NY 10038

Dissertation Format Template

The [Dissertation Template](#) available online. Please access for a template that includes format requirements for the dissertation submission process

Copyright

You can register for copyright when you submit your dissertation to ProQuest Dissertations & Abstracts for \$75. Alternatively, and for less money, you can self-register for copyright through the [U.S. Copyright Office](#) portal. If you would like to license your work under a Creative Commons license and make it open access reach out to [Greg Murphy](#) or [Noreen McGuire](#).

Research Practicum Experience (Nurs 925)

Prior to taking NURS 925, Research Practicum students must satisfactorily complete all clearance requirements of the Lienhard School of Nursing Doctor of Philosophy in Nursing and of each clinical agency where the student has been assigned a clinical placement. Clearance requirements include, but are not limited to, the following:

CLEARANCES AND BACKGROUND CHECKS

- Proof of a current registered professional nurse license issued by the New York State Education Department and a current unrestricted registration. The registration must remain current and unrestricted until the student's degree is conferred.
- Cardiopulmonary resuscitation certification ("CPR"), including use of the automated external defibrillator ("AED").
- Criminal Background Clearance
- Drug Screening Clearance
- Mandatory training (as outlined below)

Clinical agency requirements may include such things as drug screening, criminal background check, respirator mask fit test, student interview, and facility orientation. Failure to satisfy the clinical agency's requirements may result in removal of the student from the clinical agency, reassignment to another clinical agency, and subsequent delay in program progression and completion.

Students are required to upload and manage the required documents to an account they will subscribe to with [Castlebranch](#). Separate instructions on how to open and upload the documents are posted in the Lienhard School of Nursing PhD Classes Community. The registration of students who do not complete the clearance process as required will be voided, and tuition cancellations, if any, will be made in accordance with the University's Tuition Cancellation Policy. Students are also responsible for maintaining clinical clearance throughout the semester in which the student is enrolled in a clinical course. Students may not attend their practicum if any part of their clearance requirements is missing or expired. Should a student with any expired clearance requirements attend their practicum, any hours completed are considered unauthorized and cannot be included in the total hours for the course. Additionally, this is a policy violation for which the student will be counseled.

Effective September 1, 2019

Health Clearance

Prior to participating in the practicum (NURS 925) students must complete the health clearance process. No student may participate in NURS 925 without successfully completing the health clearance process (this includes health clearance, criminal background, and drug screening).

In order to ensure that all health standards have been met, the health clearance process begins as early as six months prior to the commencement of NURS 925. Only if the completed health clearance process demonstrates to the satisfaction of the Lienhard School of Nursing and any applicable clinical agency that all requisite health standards have been met, will the student be permitted to participate in NURS 925.

The health clearance process consists of completing (i) the Annual Health Assessment Form (to be completed annually); (ii) the forms pertaining to titer tests and immunizations (required only once); and (iii) any supplemental forms required by the agency(s) at which the clinical component of a course will be conducted. In addition, students are required to provide evidence of an annual influenza immunization.

For the fall semester, the health clearance process must be completed by May 1 and for the spring semester by August 1, unless otherwise instructed. The required health forms are posted in the Lienhard School of Nursing PhD Classes Community, and it is the student's responsibility to obtain these forms, complete them, and submit them as directed. Students are required to upload and manage the required documents to an account they will subscribe to with [Castlebranch](#).

Health clearance must be maintained throughout the semester in which the student is enrolled in the practicum. Students must notify the faculty of any health condition that occurs during the semester that, if it had been detected during the health clearance process, would have resulted in the student being denied health clearance. In such cases, the student will not be permitted to commence the practicum until health clearance has been completed.

In addition to the health clearance required to commence the practicum, all students must, as required by New York State law, be immunized against Measles, Mumps, and Rubella. The registration of students who do not provide proof of the required immunization to the Office of Student Assistance will be voided. Clinical agencies may require additional immunizations before students are cleared to commence a clinical placement. Students are urged to keep copies of all health forms for their personal records.

Criminal Background Check and Drug Screening

The Lienhard School of Nursing (LSN) requires a criminal background check and drug screening for all students prior to beginning the practicum. Background checks and drug screening are conducted to ensure that nursing students meet regulatory mandates and the requirements of the School of Nursing's affiliated clinical facilities and professional standards (students are referred to the ANA Code of Ethics for Nurses with Interpretive Statements (2015) which establishes the ethical standard for the profession).

The information obtained through the criminal background check and drug screening will not become part of a student's academic file and will remain confidential.

Validated criminal background reports found to be in conflict with responses in the application will be grounds for dismissal from the University based upon submission of false or misleading information on the application.

Criminal Background Check Policy

The LSN and the student will have online access to the completed criminal background check. Your criminal background check raises concerns related to your participation in a nursing program, you will be contacted by the associate dean, interim, or designee, who will schedule a meeting with the student. The criminal background check is REQUIRED as a nursing student. Criminal background checks that show evidence of a positive criminal history may be a basis for dismissal from the program. Students with pending charges, undergoing court ordered treatment, or on probation are prohibited from participation in the nursing program.

Depending upon the nature of the offense, students may seek reinstatement to the nursing program upon final disposition of pending charges, upon completion of court ordered treatment, or at the conclusion of a probation period.

Students will have the opportunity to investigate and correct adverse findings through certified court documents. Students may appeal administrative actions of revocation of admission or dismissal taken as a result of information obtained in the criminal background search by submitting a written statement of appeal and supporting documents to the Office of Associate Dean, Interim or designee within five business days of the receipt of the administrative action.

Students must report felony or misdemeanor charges (excluding minor traffic violations) which occur during enrollment within 10 business days of occurrence to the Office of the Associate Dean, Interim, or designee. Failure to report requisite information will constitute grounds for immediate dismissal.

Drug Screening Policy

All students enrolled in the Lienhard School of Nursing (LSN) who participate in clinical and or research activities must complete a drug-screening test that is consistent with professional and industry standards. As part of clinical and research activities clearance, students must submit to urine drug screening using the school-approved vendor; no other results will be accepted. Instructions on submission can be found on the LSN compliance tracking vendor website.

Refusal to provide a specimen for drug testing will be considered a positive drug test and subject the applicant to the established procedures for positive tests. Students have the right to review the information reported by the designated vendor for accuracy and completeness and to request that the designated vendor verify that the results of the drug screen provided are correct.

Students who have a positive drug screen may also be subject to discipline for violation of the University's Drug and Alcohol Policy in accordance with the University's disciplinary procedures for students. Refer to the [University Student Handbook: Alcohol and other Drug Policy](#) for additional information.

All students enrolled in the PhD Nursing Department who participate in clinical activities must complete a drug-screening test that is consistent with professional and industry standards. As part of clinical clearance, students must submit to urine drug screening using the school approved vendor; no other results will be accepted.

Instructions on submission can be found on the [CastleBranch](#) compliance tracking vendor website. Refusal to provide a specimen for drug testing will be considered a positive drug test and subject the applicant to the established procedures for positive tests.

Students have the right to review the information reported by the designated vendor for accuracy and completeness and to request that the designated vendor verify that the results of the drug screen provided are correct. Students who have a positive drug screen may also be subject to discipline for violation of the University's Drug and Alcohol Policy in accordance with the University's disciplinary procedures for students. Refer to the University Student Handbook: Alcohol and other Drug Policy at Alcohol and other Drug Policy

Positive drug screen reports will be reviewed by the associate dean, interim, or their designee, and any clinical or research related activity will immediately be suspended pending the outcomes of that review. During this time, the student may not participate in any aspects of the clinical or research program of study. The student will be interviewed by the associate dean, interim, or their designee, and any other Pace University officials relevant to the situation.

A confirmed positive drug screen will result in dismissal from the program.

Recreational and Medical Marijuana Policy

Federal laws, including the Controlled Substances Act, the Drug-Free Workplace Act, and the Drug Free Schools, and Communities Act, prohibit marijuana at educational institutions and on the premises of other recipients of federal funds. Accordingly, the University does not tolerate the unlawful possession and/or use of controlled substances on its premises. Students are prohibited from using, possessing, selling, purchasing, cultivating, processing, manufacturing or giving away marijuana/cannabis (or its derivatives), on University owned or leased property. Therefore, the possession and use of medical or recreational marijuana on University property is prohibited, even if it is lawful under New York State law.

Additionally, students, including those who are certified or registered participants in a medical marijuana program, remain strictly prohibited from using marijuana or being under the influence or impaired by marijuana while in the clinical environment or on any healthcare agency property. Use of marijuana in the clinical environment or on agency property or reporting for clinical rotations impaired or under the influence of marijuana will result in dismissal from the program.

Students who use marijuana may not be eligible for clinical placement in Federal Healthcare Facilities. Acceptance and participation in clinical rotation placements are also subject to individual clinical agency placement policies.

Drug Screening and Prescription Medication (including but not limited to Medical Marijuana)

Drug screening is required for all students, including those who use prescription medication, including but not limited to medical marijuana. Students who use prescription medication that may result in a positive drug screening, including but not limited to medical marijuana, should follow the process below to notify the University during the drug screening and evaluation process:

1. Undergo screening as required by the Department of PhD Studies in Nursing.
2. Upload supporting documentation as required or requested (e.g., copy of valid NYS Medical Marijuana Card) to student's [Castlebranch](#) account.
 - a. Provide adequate documentation from student's health care provider that use of prescription medication (including medical marijuana) does not and will not interfere with the student's ability to meet program technical standards. See above for Nursing Technical Standards.
 - i. If the health care provider's letter indicates that the use of prescription medication, including but not limited to, medical marijuana, does not interfere with the student's ability to meet technical standards, clinical placement will be attempted on behalf of the student. Clinical placement is NOT guaranteed, but rather based on the clinical agency's internal policies in regard to offering a student placement in their facility.
 - ii. If the health care provider's letter indicates that the use of prescription medication, including but not limited to medical marijuana, may interfere with the student's ability to meet technical standards, the student may contact the University's Office of Accessibility to determine whether an alternate accommodation to clinical placement may be available. Clinical placement is NOT guaranteed, but rather based on the clinical agency's internal policy.
 - b. This supporting documentation must be submitted annually, upon a change in circumstances, or if there is a question as to the student's ability to safely perform their responsibilities, engage in patient care, or otherwise poses a threat to the safety to themselves or others in the community. The University reserves a right to request additional documentation as necessary to ensure safety of students, patients, and the community.

Students are reminded that improper use or possession of prescription medication including but not limited to use or possession of medical marijuana, on university property or during clinical rotations, or reporting to clinical rotations under the influence or impaired by such substances is still strictly prohibited and violation(s) of this policy may still subject a student to disciplinary action, up to and including dismissal from the program.

Effective December 1, 2021

Licensure as Registered Professional Nurse

Doctor of Philosophy (PhD) in Nursing students must provide evidence that they are licensed by the New York State Education Department as a registered professional nurse by the completion of their first year of study.

Every student's registration must remain current and unrestricted until the student's degree is conferred. For additional information, visit the [NYSED Office of Professions](#), Licensing Requirements for a Registered Professional Nurse.

Revised September 1, 2017

Liability Insurance

Pace University carries general and professional liability insurance that includes coverage for all students in the Lienhard School of Nursing for claims arising from a student's activities in satisfaction of the requirements of his or her academic program, including clinical courses, at the University. The

University's general and professional liability insurance does not cover any claim arising from a student's activities outside of his or her academic programs at the University, including, without limitation, claims arising out of previous or current academic activities at another institution or employment. These insurances apply only to claims brought against the student by third parties; they do not provide coverage for the student if the student is injured or becomes ill from work performed during their clinical course work. It is the student's responsibility to carry personal medical insurance to cover this potential.

TRANSPORTATION

Transportation and associated fees such as parking and tolls to all off-campus programs, including clinical placements, are the responsibility of the student.

Revised September 1, 2011

POLICIES OF CLINICAL AGENCIES

Students are bound by applicable policies and procedures of the clinical agencies to which they are assigned. Students are responsible to know and comply with the policies and procedures established by the clinical agencies

LIENHARD SCHOOL OF NURSING RESOURCES

Center of Excellence for Healthcare Simulation

The Center of Excellence for Healthcare Simulation (CEHS) offers state-of-the-art resources on both the Pleasantville and New York City campuses. Utilizing a wide array of methodologies including task trainers, human patient simulators and standardized patients (actors who play the role of patients), a variety of clinical focused learning opportunities ranging from fundamental skills to high fidelity simulation are available at the CEHS. The CEHS is available for students alone or in small groups to study, practice for exams, work with tutors, and receive remediation as needed.

Hospital-like settings and clinic simulated environments provide students an opportunity to practice skills at basic and advanced levels across all Lienhard School of Nursing curricula. The CEHS's equipment and design replicate various healthcare settings including primary care, pediatrics, maternity, medical-surgical, critical care, and psychiatric-mental health, telehealth, and community. Standardized patients and human patient simulators allow students to practice skills, develop critical thinking and improve performance in a safe and nurturing environment through scenario-based educational experiences. The CEHS is equipped with video capabilities that can be used for many purposes, including self-reflection based on clinical simulations to identify areas in need of improvement.

The campus CEHS locations are:

Pleasantville
Lienhard Hall, L-2
914-773-3560

New York City
163 William Street, 6th Floor
212-618-6025

To request information or make an appointment, call the campus location directly. Visit the [CEHS](#) site for additional information.

Effective September 1, 2019

Lienhard School of Nursing Center of Excellence for Advancing Leadership, Partnerships, and Scholarship

In keeping with the Lienhard School of Nursing's vision, the Center of Excellence for Advancing Leadership, Partnerships and Scholarship (ALPS) is dedicated to supporting the academic mission of the school through external funding, facilitation of faculty scholarship, student opportunities, partnerships, and leadership development. The Center of Excellence provides opportunities for faculty to develop their scholarship in education, research, and practice through a variety of partnerships at the

local, national and international levels, and access to internal and external funding. The Center of Excellence facilitates student-centered learning experiences that further enhance the high-quality professional education of Lienhard School of Nursing students to prepare them to embrace the professional challenges in health care in the 21st century. Graduate assistantships and information about sources of financial support for students are available through the Center of Excellence. Additional information at the [Center of Excellence](#).

Sigma Theta Tau International

Omega Delta is the Pace University chapter of Sigma Theta Tau International, the international nursing honor society. The purposes of Sigma Theta Tau International are to recognize the development of leadership qualities, foster high professional standards, encourage creative work, and strengthen commitment on the part of individuals to the ideals and purposes of the profession of nursing. Candidates for membership are selected based on superior scholastic achievement.

Undergraduates who are halfway through their program, have a 3.0 cumulative quality point average ("CQPA"), and are in the upper 35% of their class, and graduate students who have completed a quarter of the Master of Science, Certificate of Advanced Graduate Study, Doctor of Nursing Practice, and Doctor of Philosophy programs, and who have a 3.5 CQPA or higher are eligible to be nominated for membership. Student standing is reviewed by the Omega Delta chapter faculty counselor and eligible students are invited in writing to consider membership. Outstanding community leaders in nursing are also eligible for membership.

For additional information, visit [Sigma](#).

Revised September 1, 2019

HEALTH CARE

University Health Care (UHC)

UHC offers a full range of primary care services to the Pace University community. University Health Care is staffed by nurse practitioners (registered nurses with advanced credentials who are certified to prescribe medications) and consulting physicians. University Health Care is located at

New York City
1 Pace Plaza, 6th Floor
(212) 346-1600

Pleasantville
Paton House, Ground Floor
(914) 773-3760

For additional information, visit [University Health Care](#).

Health Insurance

For Information about accident and sickness insurance, visit [Health Insurance](#).

Immunization Compliance Policy

Students are required to comply with the requirements of the New York State Public Health Law regarding immunity against measles, mumps, and rubella. Details about these requirements may be found at [Immunization-Compliance](#).

Revised September 1, 2013

Meditation Room

Meditation rooms are available on the New York and Pleasantville campuses at:

New York City
1 Pace Plaza, 2nd Floor
Entrance is next Lecture Hall North.
Proceed thru the door for W205D
to enter the hall for room W204B.

Pleasantville
Wilcox Hall
Across from the elevator
(no room number)

Lactation Room

Lactation rooms are available for use at both campuses and require security access.

New York City
1 Pace Plaza
2nd Floor West Side, W205A
(same hallway as the computer labs
W205 & W206)

Pleasantville
15D Miller Hall

In New York City, access can be given by visiting the Security office on the B-level of 1 Pace Plaza. In Pleasantville, access can be given by Security by calling (914) 773-3400.

ADDITIONAL RESOURCES

Career Services

Career Services provides undergraduate and graduate students and alumni of the LSN with information about careers and job searches. It is a resource to explore employment opportunities and the best way to present themselves to prospective employers. Examples of services include, among other things, preparation of resumes and cover letters and developing interviewing skills and organizing an annual spring nursing career fair.

Career Services office are located on both the Pleasantville and New York City Campuses at:

New York City
41 Park Row
14th Floor
(212) 346-1950

Pleasantville
861 Bedford Road
Paton House
(914) 773-3415

For additional information, visit [Career Services](#).

Revised September 1, 2021

Computer Resource Centers

The Computer Resource Centers offer students a wide variety of resources including Internet access, wireless laptop workstations, over 50 software packages, headphones, USB connections, scanners, high-powered printers, and MAC computers.

Visit [Computer Labs](#) to view all the lab locations across the campuses.

For additional information, visit [Computer Resource Center](#).

Counseling Center

The services of the Counseling Center address personal, academic, and vocational concerns. In addition, the Counseling Center is available to victims of sexual assault and can provide crisis intervention assistance, emotional support, information, and referrals to medical, police, and other pertinent services. Information discussed during counseling sessions is confidential. The services of the Counseling Center are offered for no fee to all members of the Pace University community.

For additional information, visit [Counseling Services](#).

Revised September 1, 2010

Education Records

The Family Educational Rights and Privacy Act, commonly referred to as FERPA, is a federal law that protects the confidentiality of student education records and provides for a student's right to review and request correction of such records. For information about student's rights under FERPA, visit [Student Records Policy](#).

Revised September 1, 2021

Email Communication and Appropriate Use of Information Technology

Students are expected to use Pace University email to communicate with faculty and for all University related communications. Email sent from personal, or work email addresses will not be responded to. In the event that there are difficulties using Pace email, students are to contact Information Technology Services to resolve the issue.

The Pace University Appropriate Use Policy for Information Technology (IT) is posted on the [Division of Information Technology \(DoIT\)](#) web page. Information Technology (IT) at Pace University encompasses the use of all campus computing, networking (data, voice, and video), document services, educational media, and management information systems technologies. These I.T. resources support the instructional, research, and administrative activities of the University.

Users of these services and facilities have access to valuable University resources, to sensitive data and to external networks. Consequently, it is important for all users to behave in a responsible, ethical, and legal manner. In general, appropriate use means understanding the intended use for Pace IT (and making certain that your use complies), respecting the rights of other Pace information technology users, maintaining the integrity of the physical facilities, and obeying all pertinent license and contractual agreements.

It is the responsibility of each Pace student to read and abide by the terms of the [Appropriate Use Policy for IT](#).

Financial Aid

For information, visit [Financial Aid](#).

Learning Commons

Learning Commons offers Pace University students tutoring for course writing assignments and general skill development related to reading and writing and workshops on study skills and time management. In addition, the Learning Commons also provides assistance in the use of the Publication Manual of the American Psychological Association.

For additional information, visit [Learning Commons](#).

Leave of Absence, Medical Leave of Absence, and Resumption of Studies Policy

Information about a leave of absence and a medical leave of absence from the University may be found in the [Pace Catalog](#).

Information about resuming studies is set forth in the [Resumption of Studies Policy](#).

Revised September 1, 2016

Libraries

Henry Birnbaum Library

Edward and Doris Mortola Library

New York City Campus
(212) 346-1332)

Pleasantville Campus
(914) 773- 3380

Library hours vary during semesters, vacations and summer sessions, and many library resources are accessible online. Of particular interest to LSN students are the many databases available to support nursing research.

For additional information about the nursing research resources, visit the [Library](#).

Revised September 1, 2011

Office of the Registrar

The Office of the Registrar provides information and services related to course registration, scheduling, academic catalogs, transcripts and conferral of degrees. The Registrar's office can be reached through the [Help Desk](#).

PROGRAM RELATED GRIEVANCES AND COMPLAINTS

The Lienhard School of Nursing strives to provide an environment of mutual respect, cooperation, and understanding. Notwithstanding this commitment, problems and concerns sometimes occur. Resources and procedures are available to students for resolving complaints and addressing concerns. For example, concerns about violations of University policies are addressed through the [University Grievance Procedure: Student Grievances Procedure](#). The Lienhard School of Nursing Academic Progression Appeals Committee decides appeals of decisions dismissing students from nursing programs and the Lienhard School of Nursing for failing to satisfy the applicable academic standards.

Concerns or complaints about the Lienhard School of Nursing that are outside the scope of any existing University or Lienhard School of Nursing procedure may be addressed in accordance with the following procedure:

- The complaint must be in writing and contain the date, the student's name, telephone number, email address, the program in which the student is enrolled, and as much detail as possible about the student's concerns.
- Complaints or concerns about any of the Lienhard School of Programs or the Center for Excellence in Healthcare Simulation (CEHS) should be submitted to the chair of the department in which the student is enrolled.
- The chair (or their respective designees) will, in a timely manner, investigate the complaint, take appropriate action, and notify the student of the resolution of the matter. If the student is not satisfied with the resolution, the student may, within 5 business days of date of the notification, appeal the resolution in writing to the associate dean, interim, for the Lienhard School of Nursing.

Revised September 1, 2021

Safety and Security Department

The Safety and Security Department is responsible for ensuring the safety and security of all members of the Pace University community 24 hours a day, 365 days per year. Safety and Security also issues parking permits and identification cards.

The locations and telephone numbers of Safety and Security are:

New York Campus
One Pace Plaza, B-Level
(212) 346-1800

Pleasantville Campus
Alumni Hall
(914) 773-3400

White Plains (Law School)
Preston Hall
(914) 422-4300

For additional information, visit [Safety and Security](#).

Sources of Information

Additional information about the Lienhard School of Nursing and Pace University may be found, on the [Pace University website](#), the [Lienhard School of Nursing website](#), in the [Pace University Student Handbook](#), and in the [Pace University Undergraduate Catalog](#).

Students are responsible for knowing and complying with all applicable policies of Pace University and the Lienhard School of Nursing.

Student Accounts

The Student Accounts office assists with billing, payments, outside scholarships, immunization compliance and Veterans Education Benefits. Student Accounts can be contacted by telephone at 1-877-672-1830, by email studentaccounts@pace.edu, or via the [Help Desk](#).

PACE POLICIES PROHIBITING DISCRIMINATION

Sex-Based Misconduct Policy and Procedures

As part of its commitment to providing a safe environment for every member of the University community and to ensuring that no student, faculty, or staff member is excluded from participating in or denied the benefits of any University program or activity on the basis of sex.

Pace University prohibits sex-based misconduct. Sex-Based Misconduct includes sexual harassment, sexual assault, gender-based harassment, sexual exploitation, domestic violence, dating violence, and stalking. The University also prohibits retaliation against anyone who reports an incident of sex-based misconduct or participates in an investigation or proceeding related to any such report.

For additional information, visit [University's Sex-Based Misconduct Policy and Procedure](#).

Members of the University community who have questions about the sex-based misconduct policy and procedures or accessing available resources should contact the executive director for Institutional Equity/ Title IX Coordinator at (212) 346-1310.

Discrimination, Non-sex-based Harassment and Retaliation

Pace University is strongly committed to maintaining a working and learning environment that is free from unlawful Discrimination, Harassment, or Retaliation. The University is an equal opportunity employer and an academic institution which strongly believes that all employment and academic decisions must be made without regard to whether an employee or student possesses characteristics protected by federal, state, or local law.

All University officers, administrators, supervisors, staff, faculty members, students, visitors, and applicants, as well as vendors, consultants and contractors with whom the University does business are prohibited from engaging in discrimination, harassment, or retaliation.

For additional information, view the [University's Discrimination, Non Sex-Based Harassment and Retaliation Policy and Procedure](#).

Members of the University community who have concerns about discrimination or harassment should contact the Executive Director Institutional Equity/ Title IX Coordinator at (212) 346-1310.

Reasonable Accommodations for Students with Disabilities

The University's commitment to equal educational opportunities for students with disabilities includes providing reasonable accommodations for the needs of students with disabilities. To request an accommodation for a qualifying disability, a student must self-identify and register with the Office of Accessibility Services for his or her campus.

Except for the Office of Accessibility Services, no one, including faculty, is authorized to evaluate the need and arrange for an accommodation. Moreover, no one, including faculty, is authorized to contact the Office of Accessibility Services on behalf of a student.

For additional information, visit [Resources for Students with Disabilities](#) or contact:

New York City Campus
(212) 346-1526

Pleasantville Campus
(914) 773-3710

Members of the University community who believe that they have been denied a reasonable accommodation for a disability to which they may be entitled should contact the Title IX Coordinator/Affirmative Action Officer at (212) 346-1310.

APPENDIX C

Qualifying Exam Paper Rubric

Student Name: _____

Faculty Evaluator: _____

Grading Instructions:

The rubric will evaluate the student's ability to:

- demonstrate a broad mastery of core content, theory, and research in a discipline,
- select an appropriate phenomenon for an integrative literature review,
- critically appraise empirical and conceptual literature on the selected phenomenon using articles, books, and/or dissertations, and
- undertake independent scholarship.

*Definition: "An integrative review is a specific review method that summarizes past empirical or theoretical literature to provide a more comprehensive understanding of a particular phenomenon (Broome, 1993). An integrative review presents the state of the science of what is known about the phenomenon.

Criteria	Consistently Met	Met Majority of the Time	Seldom Met	Not Met	Score
1. Introduction of Phenomenon (10 points)	9 to 10	6 to 8	1 to 5	0	
2. Literature Search (20 points)	17 to 20	11 to 16	1 to 10	0	
3. Discussion (30 points)	25 to 30	16 to 24	1 to 15	0	
4. Summary and Conclusion (20 points)	17 to 20	11 to 16	1 to 10	0	
5. Mechanics of Writing (20 points)	17 to 20	11 to 16	1 to 10	0	
Total Points of First Exam					

Please see below for a detailed description of each of the criteria.

Criteria

Introduction of Phenomenon (10 points)

- Concepts of interest are clearly identified
- The target population and health care problem are clearly identified
- The purpose of the integrative review is stated and well developed. (A properly stated, specific purpose for an integrated review will facilitate the ability to accurately identify variables and extract appropriate data from primary sources).

Faculty Evaluator Comments _____

Literature Search (20 points)

- The literature review process of an integrated review is clearly documented and includes search terms, the databases used, additional search strategies, and the inclusion and exclusion criteria for determining relevant primary sources.
- The review includes both qualitative and quantitative evidence with the intent to provide a broad perspective of the phenomenon.
- The review includes the incorporation of primary sources, such as PhD dissertations.
- The process used for compiling research-based and theoretical evidence is clear.
- This evidence reveals a contemporary review that includes the timeframe of the studies published (a statement that includes..."the review included studies published from 1999 to 2014).
- Database searches are clearly identified, for example: MEDLINE, CINAHL, Proquest nursing, ERIC, Journals@Ovid, PsychINFO, and ScienceDirect.
- Categories for search terms are included.
- Clear inclusion criteria are described for the sources included in the paper.
- Search terms are identified and presented in a table as appendix. Students were instructed on how to use a critical appraisal for empirical literature using the Quantitative studies critical appraisal checklist from Bowling (2009) *see attached. And a Qualitative studies critical appraisal check list by Pearson (2004)* see attached.
- The limitations of the review are clearly identified.

Faculty Evaluator Comments_____

Discussion (30 points)

- A synthesis is formed and sufficiently supports the phenomenon under review.
- The findings are discussed as follows:
 - Sampling frame is identified
 - Findings are succinctly stated and linked to other studies in the review
 - Appropriate statistics are presented
 - consistency with prior studies with possible reasons for any discrepancies in findings,
 - The implications for future research are presented and are based on the findings

Faculty Evaluator Comments_____

Summary and Conclusion (20 points)

- The summary provides a "nutshell" of the findings
- The summary includes the student's interpretation of the literature findings
- The summary includes implications for future research including identification of the "holes" in the literature
- The conclusion is a brief summary paragraph that highlights the main findings and implication and reflects the findings relative to the stated purpose of the review.

Faculty Evaluator Comments_____

Mechanics of Writing (20 points)

- The paper is systematically organized using headings and spacing to facilitate the reader's grasp of major elements.
- Each section of the paper is appropriately introduced
- The paragraph is the unit of composition and paragraphs include topic sentences that are fully developed within the body.

- There are transition sentences between topics and when needed between paragraphs.
- The language is clear and precise without exaggeration or superfluous wording.
- The active voice is used more than the passive voice.
- Terminology is consistent throughout the paper.
- Grammar and spelling are correct.
- References are accurate and follow APA guidelines

APPENDIX D

**Pace University
Lienhard School of Nursing
PhD in Nursing
Dissertation Topic - Committee Chair Selection Form**

Name: _____

Date: _____

Cohort: _____

Dissertation Committee Chair: _____

Working Title: _____

To the Student

Please attach a summary of your proposed research, starting with its purpose and a general statement of the method to be employed. This statement should be approximately half a page with a paragraph on the area to be researched and one on the intended type of research design. Note: All information on this page may be changed at a later date.

To the Dissertation Committee Chair

I have read the topic proposal submitted by _____ and have discussed it in detail with the student. In my judgment it (1) meets the minimum standards required for the formulation and design of a research project; (2) is practically feasible in terms of available space, equipment, and the number and type of subjects available; and (3) does not involve procedures that would violate the code of ethics.

APPENDIX H

Dissertation Evaluation Form

Submit your dissertation in DRAFT FORM (providing the number of copies required in your discipline) to your committee for approval. If the committee approves the draft, it will recommend that you advance to the Final Examination. This is an oral defense of the dissertation evaluated by your committee. If all required changes are made prior to the defense, you may bring a final copy of the dissertation to the examination.

Date: _____

Name of Student: _____

Degree Sought: _____

Title of Dissertation: _____

Dissertation Committee Chair: _____ Campus: _____

Evaluator: _____ Campus: _____

To the Evaluator: Please read the student's dissertation carefully before evaluating it on the scale below. In making your judgment be sure to consider such factors as the skill with which the problem was formulated, the soundness of the research design, the nature and the extent of data analyses, the integration of findings by means of theory and concept, etc. Attention should also be given to the way the thesis is written and organized, taking into account the fact that the presentation and style should meet at least the minimum editorial demands of journal editors.

Please send the original to the Executive Office. In the event that category "b" is checked, the evaluator should give the basis of his/her evaluation in the space allotted for comments below.

- _____ a. I approve the student's written doctoral dissertation as it now stands, and recommend the student be given the Final Oral Examination.
- _____ b. Except for minor revisions, I approve the student's written doctoral dissertation and recommend that the student be given the Final Oral Examination. I assume that the candidate's thesis sponsor will assume responsibility for these revisions.
- _____ c. I do not approve the student's written doctoral dissertation it now stands.

APPENDIX I

Qualifying Exam Grading Rubric

Instructions for Evaluator

Please enter a score for each criterion. Please see pages 2-3 for a detailed description of each of the criteria. You can provide brief comments on pages 2-3 but we are not returning papers to the students, so you do not need to provide comments/feedback on the papers.

Student Name: _____

Faculty Evaluator _____

Grading Instructions

The rubric will evaluate the student's ability to:

- demonstrate a broad mastery of core content, theory, and research in a discipline,
- select an appropriate phenomenon for an integrative literature review,
- critically appraise empirical and conceptual literature on the selected phenomenon using articles, books, and/or dissertations, and
- undertake independent scholarship.

*Definition: "An integrative review is a specific review method that summarizes past empirical or theoretical literature to provide a more comprehensive understanding of a particular phenomenon" (Broome, 1993). An integrative review presents the state of the science of what is known about the phenomenon.

Criteria	Consistently Met	Met Majority of the Time	Seldom Met	Not Met	Score
1. Introduction of Phenomenon (10 points)	9 to 10	6 to 8	1 to 5	0	
2. Literature Search (20 points)	17 to 20	11 to 16	1 to 10	0	
3. Discussion (30 points)	25 to 30	16 to 24	1 to 15	0	
4. Summary and Conclusion (20 points)	17 to 20	11 to 16	1 to 10	0	
5. Mechanics of Writing (20 points)	17 to 20	11 to 16	1 to 10	0	
Total Points of First Exam					
A grade of 80 must be obtained in order for a grade of "Pass"					

Criteria

Introduction of Phenomenon (10 points)

- Concepts of interest are clearly identified
- The target population and health care problem are clearly identified.
- The purpose of the integrative review is stated and well developed. (A properly stated, specific purpose for an integrated review will facilitate the ability to accurately identify variables and extract appropriate data from primary sources).

Faculty Evaluator Comments _____

Literature Search (20 points)

- The literature review process of an integrated review is clearly documented and includes search terms, the databases used, additional search strategies, and the inclusion and exclusion criteria for determining relevant primary sources.
- The review includes both qualitative and quantitative evidence with the intent to provide a broad perspective of the phenomenon.
- The review includes the incorporation of primary sources, such as PhD dissertations.
- The process used for compiling research-based and theoretical evidence is clear.
- This evidence reveals a contemporary review that includes the timeframe of the studies published (a statement that includes..." the review included studies published from 1999 to 2014).
- Database searches are clearly identified, for example: MEDLINE, CINAHL, Proquest nursing, ERIC, Journals@Ovid, PsychINFO, and ScienceDirect.
- Categories for search terms are included.
- Clear inclusion criteria are described for the sources included in the paper.
- Search terms are identified and presented in a table as appendix. Students were instructed on how to use a critical appraisal for empirical literature using the Quantitative studies critical appraisal checklist from Bowling (2009) *see attached, and a Qualitative studies critical appraisal checklist by Pearson (2004) *see attached.
- The limitations of the review are clearly identified.

Faculty Evaluator Comments _____

Discussion (30 points)

- A synthesis is formed and sufficiently supports the phenomenon under review.
 - The findings are discussed as follows:
 - Sampling frame is identified.
 - Findings are succinctly stated and linked to other studies in the review.
 - Appropriate statistics are presented.
 - Consistency with prior studies with possible reasons for any discrepancies in finding.
 - The implications for future research are presented and are based on the findings.

Faculty Evaluator Comments _____

Summary and Conclusion (20 points)

- The summary includes the student's interpretation of the literature findings.
- The summary includes implications for future research including identification of the "holes" in the literature.
- The conclusion is a brief summary paragraph that highlights the main findings and implications and reflects the findings relative to the stated purpose of the review.

Faculty Evaluator Comments _____

Mechanics of Writing (20 points)

- The paper is systematically organized using headings and spacing to facilitate the reader's grasp of major elements.
- Each section of the paper is appropriately introduced.
