

A hazardous material (HAZMAT) spill is a situation in which harmful substances are released into the environment.

If a HAZMAT spill occurs, a Pace emergency alert will be sent to provide information regarding the location and scope of the incident, as well as actions to take (if any).

To notify response teams of a HAZMAT spill:

Call Pace Security to notify them of the spill, and provide the exact location & nature/extent of the spill.

Call 911 or Pace Security to notify them of any injuries sustained from the spill.

Actions to take during HAZMAT spill:

Isolate the affected area immediately, and evacuate the contaminated area to a safe location.

Alert others to stay clear of the area, & post a warning sign (if possible).

If skin is exposed to chemicals, remove contaminated clothing & use safety shower.

If chemical touches your eyes, immediately rinse your eyes and inner surface of eyelid with water.

You can dial 777 or press the Security button from any Pace phone in an emergency.

New York City Campus Security: (212) 346-1800
