

Setter's Book Bundle Digital Course Materials

With the Setter's Book Bundle, instructors select the format (print or digital) students receive their materials. Selection of format can be made at a section level; i.e. virtual sections could use digital while residential sections could use print. Below reviews the different types of digital content delivery and how students will access the content whether they are opted-in or opted-out of the Setter's Book Bundle.

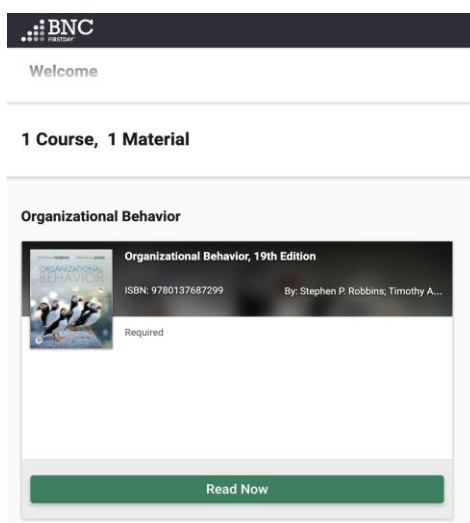

Access to eBooks for Setter's Book Bundle Students

eBooks

Setter's Book Bundle students will access their eBooks initially from Brightspace/Classes. Once they have fully launched their eBook through the **BNC Course Materials** link, they can access the eBook directly through the Yuzu app. The opt-out students upon purchase or rental of an eBook will receive an email with instructions on how to access the eBook.

The **BNC Course Materials** link in your Brightspace/Classes course provides direct access to the eBook for Setter's Book Bundle students.

NOTE: Opt-out students *do not* access eBooks from Brightspace/Classes.

Adding the **BNC Course Materials** link takes a few clicks/taps and the process is outlined in the [Instructor's Guide to Brightspace/Classes](#).

eBooks are also available through the free **Yuzu** app from VitalSource available in the device's app store.

Access to courseware for Setter's Book Bundle Students

Courseware – Publisher Direct

For the majority of publishers, the Setter's Book Bundle students do not need to enter an access code when they click/tap on the publisher's courseware resource item in their Brightspace course. This experience is referred to as code-less or Publisher Direct because the Setter's Book Bundle students have removed the need for an access code (providing direct access) for students to the courseware in Brightspace.

Access and use of the majority of courseware provided by different publishers are integrated into Brightspace. Some publishers' courseware includes online quizzes and grade syncing which are made possible with the integration. For details on how to use the publisher's courseware, please refer to the materials you received from the publisher or contact your publisher's representative.

The Setter's Book Bundle link provides students with access to their course materials information, but it does not replace the publisher-specific courseware link required for courseware access and grade synchronization. Students will not be able to access their materials through the SBB link and will need to use the publisher specific link.

NOTE: To provide student access to publisher direct courseware, instructors must add the publisher's LTI/resource link to their Brightspace course and complete the publisher's course pairing/setup process.

NOTE: If your publisher requires an external publisher link to be used, and you aren't using any materials that are accessed through the SBB link, you may want hide the SBB link by selecting the "eye" icon in your Brightspace. This will hide the link so students cannot access it through your course.

In our example, the details of the ELECTRONIC PRODUCT [courseware] item reveal the publisher is Cengage. Adding the Cengage resource item to the Brightspace course in this example provides direct access to the publisher's courseware. Please refer to the materials the publisher has provided for specifics on how to set up and use their courseware.

Current Student Pricing

Pricing is subject to change

New:	\$ 186.25
Print, New:	\$ 198.65
Print, Used:	\$ 149.00
Print, New:	\$ 198.65
Print, Used:	\$ 149.00

Adding the **SETTER'S Book Bundle** link takes a few clicks/taps and the process is outlined in the [Instructor's Guide to Brightspace](#).

NOTE: *both* the SETTER'S Book Bundle students **AND** the opt-out students *must* access the publisher's courseware from Brightspace. If it is their first time accessing content from this publisher, they may be prompted to create an account. After opt outs are processed, students that have opted out of the SETTER'S Book Bundle will have their access removed and be prompted to redeem an access code or purchase access to the content to continue using the courseware product.

NOTE: You determine the name of the publisher's resource or resources, and it is recommended to be reflective of the publisher's name and/or the activity/ies of their courseware.

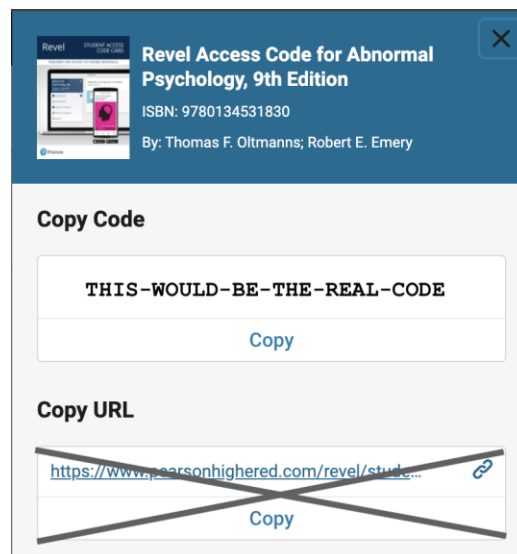

Access to courseware for Setter's Book Bundle Students

Courseware – Access Code Reveal

For these publishers, the Setter's Book Bundle students are prompted for an access code when the students first attempt to access the publisher's courseware. This method is referred to as *Access Code Reveal*. To get their access code/s, the students click/tap the Reveal Access Code Button shown on the tile in the **BNC Course Materials** link on your Brightspace/Classes course.

In the example below - the Setter's Book Bundle students will see the code and a URL [link]. The students click/tap **Copy** in the box below **Copy Code**.

NOTE: Copy URL **is NOT used**. The X has been added to the image for emphasis. Students will redeem the code in the LTI or link you have placed in your course.

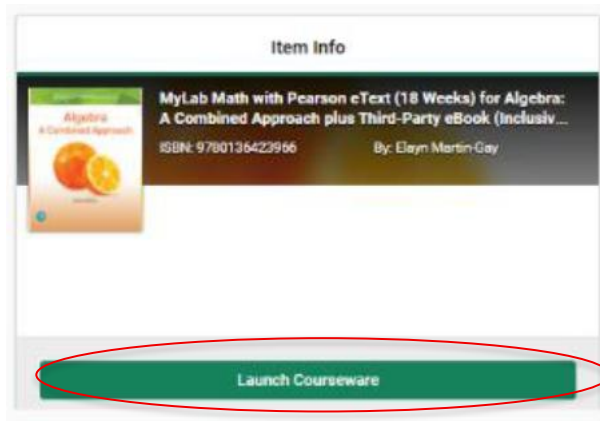

Adding the **BNC Course Materials** link takes a few clicks/taps and the process is outlined in [the Instructor's Guide to Brightspace/Classes](#).

NOTE: All students registered in a digital course will receive an access code in the BNC Course Materials link. After the opt out has been processed, students that have opted out of the program will have access removed and will need to purchase a code for the material. They can do so by clicking the Buy Now button in the BNC Course Materials link, purchase directly from the publisher or any other vendor. Students should NOT use the code they purchased outside of Setter's Book Bundle until after the opt-out period.

Access to courseware for Setter's Book Bundle Students

Courseware – Publisher SSO

Some publishers have an SSO (single-sign-on) integration for their courseware. Students in the Setter's Book Bundle program will access courseware by clicking on the **BNC Course Materials** link and then clicking on the "Launch Courseware" button circled in red in the example below to launch directly into their account for this material.

Note: Opt-Out students can regain access to their SSO material by either clicking Buy Now in the BNC Course Materials link, or purchasing access directly from the publisher within the courseware.

Adding the **BNC Course Materials** link takes a few clicks/taps and the process is outlined in the [Instructor's Guide to Brightspace/Classes](#).
