GUIDE FOR JOBSEEKERS

Rewarding Careers in Hudson Valley Healthcare

Rewarding Careers in the Hudson Valley's Healthcare Sector

A GUIDE FOR JOBSEEKERS

Simone Healthcare Development is delighted to underwrite the publication of the 2025 edition of the WCA's Healthcare Talent Guide. As a leading developer of healthcare facilities, we well understand that the need for talent is top of mind for every healthcare provider.

The healthcare sector is the largest growth sector in the Hudson Valley, employing over 60,000 people and generating $18 billion in economic activity. The healthcare sector is expected to add over one million jobs by 2033, which is approximately 24% of all jobs expected to be added to the economy. And many of the top healthcare employers are here in the Hudson Valley.

Healthcare is an exciting and dynamic field that offers many possibilities. It provides good salaries, opportunities for advancement, and challenging and interesting work. You become part of the caring community that is truly helping others: Be part of a team that brings hope and comfort to the sick and elderly; help identify and treat various medical conditions; join the information technology (IT) and administrative infrastructure that makes up the backbone of healthcare institutions… These are just a few examples of how rewarding it is to work in healthcare.

There are also careers in fields such as nursing, physical therapy, occupational therapy, pharmacy, medical laboratory technology, respiratory therapy, nutrition, radiologic technology, and more. These careers pay well and in our region, average healthcare wages are 40% higher than the national average. There are numerous routes into the field and pathways for career growth and many jobs do not require a college degree.

This guide will help you identify local training providers and healthcare employers. There are charts on the in-demand jobs in our region and information on many other jobs that show the breadth and scope of the healthcare profession. The QR codes for each employer will connect you directly to their respective career pages.

When you are considering where your future will take you, consider healthcare. Join a team that makes a difference in people's lives. It will make a difference in your life too!

Sincerely,

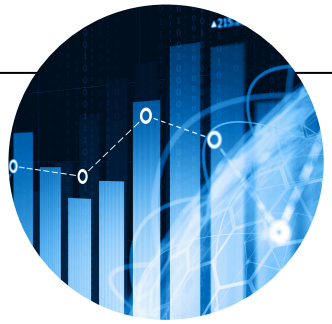

Joe Simone

Nursing Jobs

HIGH-DEMAND JOB DESCRIPTIONS

Certified Nursing Assistants (CNAs) provide or assist with basic care or support under the direction of onsite licensed nursing staff. Perform duties such as monitoring health status, feeding, bathing, dressing, grooming, toileting, or ambulation of patients in a health or nursing facility. *Candidates must pass the New York State Nurse Assistant Certification Exam to become certified for employment. Courses are offered in vocational schools and can be obtained within a few months.*

Clinical Medical Assistants, Patient Care Technicians, & Patient Care Aides perform administrative and certain clinical duties under the direction of a physician. Administrative duties may include scheduling appointments, maintaining medical records, billing, and coding information for insurance purposes. Clinical duties may include taking and recording vital signs and medical histories, preparing patients for examination, drawing blood, and administering medications as directed by a physician. *A training course and certificate are required.*

Licensed Practical Nurses (LPNs) and Licensed Vocational Nurses (LVNs) care for ill, injured, or convalescing patients or persons with disabilities in hospitals, nursing homes, clinics, private homes, group homes, and similar institutions. May work under the supervision of a registered nurse. *Generally, training is a 12 to 18-month program at a state-approved school of practical nursing that prepares candidates for a national licensure exam. Most programs require a high school diploma or equivalent.*

Registered Nurses (RNs) assess patient health problems and needs, develop and implement nursing care plans, and maintain medical records. Administer nursing care to ill, injured, convalescent, or disabled patients. May advise patients on health maintenance and disease prevention or provide case management. *Nurses can practice with either a two-year associate's degree (ASN) or a four-year bachelor's degree. Most hospitals now require that new hires have a four-year degree. Beginning in June 2019, associate-trained nurses are required to obtain a baccalaureate degree within ten years of initial licensure in New York State.*

Nurse Practitioners (NPs) diagnose and treat acute, episodic, or chronic illness, independently or as part of a healthcare team. May focus on health promotion and disease prevention. May order, perform, or interpret diagnostic tests such as lab work and x rays. May prescribe medication. *Must be registered nurses who have specialized graduate education.*

Technician & Technologist Jobs

HIGH-DEMAND JOB DESCRIPTIONS

Clinical Laboratory Technologists & Clinical Laboratory Technicians perform routine medical laboratory tests for the diagnosis, treatment, and prevention of disease. The Technician may work under the supervision of a medical technologist. *The clinical laboratory technologist must have a bachelor's degree in clinical laboratory sciences (medical technology), or complete an accredited one-year clinical laboratory technology education program in addition to a bachelor's degree in another subject. Clinical laboratory technicians must have an associate's degree in clinical laboratory technician science (medical laboratory technician).*

MRI (Radiologic) Technologists perform diagnostic imaging examinations, either in a hospital or free-standing radiology center. Responsible for accurately positioning patients and ensuring that a quality image is produced. They work closely with radiologists, the physicians who interpret medical images to either diagnose or rule out disease or injury. *Radiologic technologists may specialize in computed tomography, magnetic resonance imaging (MRI), mammography, and other types of imaging and must be certified in these specialty areas by the American Registry of Radiologic Technologists. A two-year program in radiography given by hospitals or community colleges and a passing grade on a national certification examination is required. There are some four-year bachelor's programs.*

X-Ray (Radiologic) Technologists perform diagnostic imaging examinations, either in a hospital or free-standing radiology center. Radiologic technologists who perform imaging examinations are responsible for accurately positioning patients and ensuring that a quality image is produced. They work closely with radiologists, the physicians who interpret medical images to either diagnose or rule out disease or injury. *Radiologic technologists may specialize in computed tomography, magnetic resonance imaging (MRI), mammography, and other types of imaging and must be certified in these specialty areas by the American Registry of Radiologic Technologists. A two-year program in radiography given by hospitals or community colleges and a passing grade on a national certification examination is required. There are some four-year bachelor's programs.*

Respiratory Therapists assess, treat, and care for patients with breathing disorders. Assume primary responsibility for all respiratory care modalities, including the supervision of respiratory therapy technicians. Initiate and conduct therapeutic procedures; maintain patient records; and select, assemble, check, and operate equipment. *Therapists must complete a one-year certification program to be licensed by the State of New York.*

Technician & Technologist Jobs Continued

HIGH-DEMAND JOB DESCRIPTIONS

Surgical Technologists assist in operations, under the supervision of surgeons, registered nurses, or other surgical personnel. May help set up operating room, prepare and transport patients for surgery, adjust lights and equipment, pass instruments and other supplies to surgeons and surgeons' assistants. *Surgical technologists must earn a degree or certificate through a program accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP) or the Accrediting Bureau of Health Education Schools (ABHES). Surgical technology degree programs usually take nine months to two years to complete, depending on the school, and are offered by community colleges, vocational schools, and universities. Surgical technologists are required to complete 15 hours per year of continuing education to maintain their New York State certification.*

First Responder Jobs

HIGH-DEMAND JOB DESCRIPTIONS

Emergency Medical Technicians (EMTs) & Paramedics (EMT-Ps) assess injuries and illnesses and administer basic emergency medical care. May transport injured or sick persons to medical facilities. Typical care provided by EMTs and paramedics may include administering cardiac resuscitation, treating shock, providing initial care to poison or burn victims, and transporting patients to appropriate hospitals for definitive care. *Training programs may be given by hospitals, community colleges, firehouses, and/or police departments. Courses run from approximately 130 hours to in excess of 400. All advanced training courses are given in conjunction with on-site participation in hospitals. Some colleges offer EMT training at the associate's degree level.*

Behavioral Health Jobs

HIGH-DEMAND JOB DESCRIPTIONS

Clinical Social Workers provide individuals, families, and groups with the psychosocial support needed to cope with chronic, acute, or terminal illnesses. Services include advising family caregivers. Provide patients with information and counseling, and make referrals for other services. May also provide case and care management or interventions designed to promote health, prevent disease, and address barriers to access to healthcare.

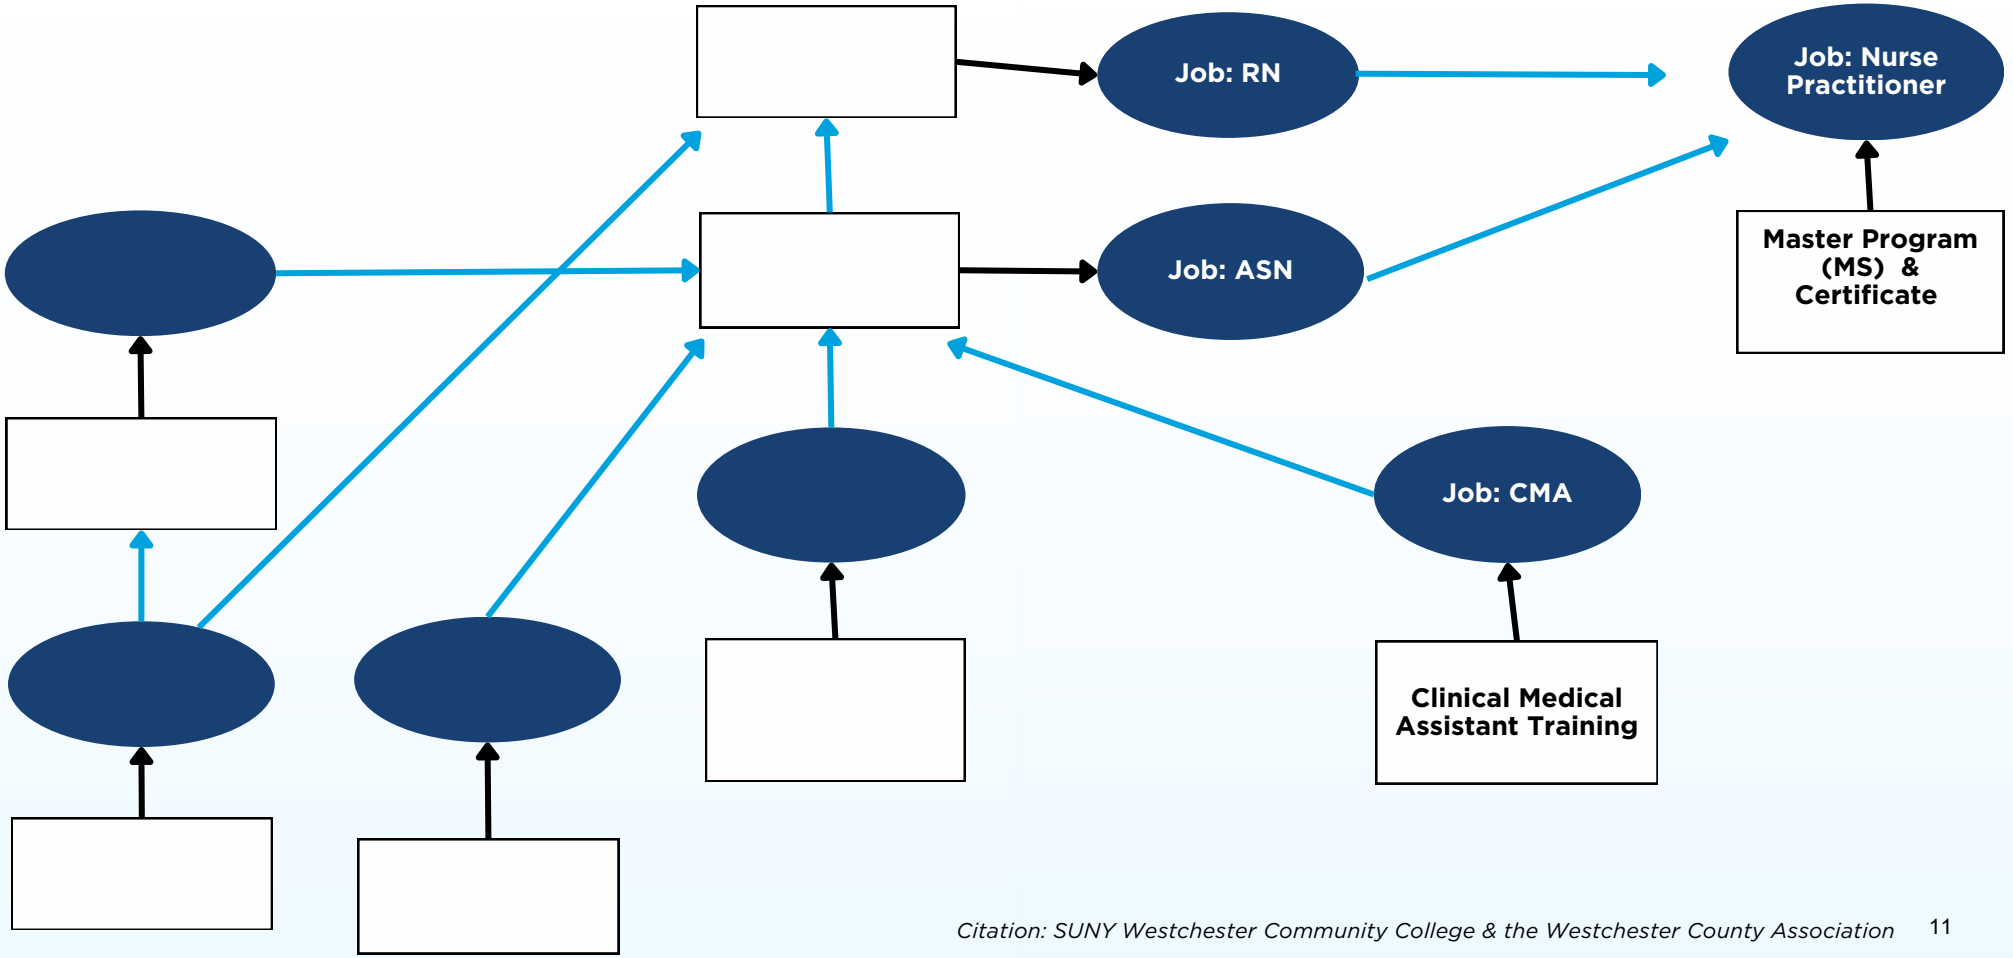

Clinical and Counseling Psychologists assess, diagnose, and treat mental and emotional disorders of individuals through observation, interview, and psychological tests. Help individuals with distress or maladjustment understand their problems through their knowledge of case history, interviews with patients, and theory. Provide individual or group counseling services to assist individuals in achieving more effective personal, social, educational, and vocational development and adjustment. May design behavior modification programs and consult with medical personnel regarding the best treatment for patients.

Additional Healthcare Occupations

In addition to the High-Demand jobs, a career in healthcare offers many other opportunities.

ADMINISTRATIVE AND INFORMATION SERVICES

Medical Administrative Assistants may perform administrative tasks, such as updating and filing patients' medical records, completing insurance forms, arranging for hospital admissions and laboratory services, and performing general administrative tasks. *A 6-month certificate is generally required.*

Medical Billers and Coders manage health information data provided by clinicians by ensuring accuracy, quality, completeness, and security in both paper and electronic form. They obtain detailed information regarding disease, injuries, surgical operations, and other procedures. This detailed information is translated into numeric codes by assigning diagnostic and procedural codes using a universally recognized coding system. These medical codes are used extensively for insurance reimbursement, preparation of hospital statistical reports, and by the government to identify health care concerns to the public at large. *A minimum of a high school diploma is required; an associate's degree is preferred. Training is offered at community colleges and technical schools.*

Patient Access Representatives interview patients, verify financial data, and prepare initial patient information and medical records required to admit patients to the hospital. *A high school diploma or high school equivalency is a requirement for this position.*

Applications Analysts maintain and support various computer applications and assist with the installation of clinical information systems. Responsibilities include troubleshooting computer and systems problems, coordinating and/or performing software upgrades, and providing technical support. *A bachelor's degree with clinicall health management experience is typically preferred.*

Clinical Informaticists develop and maintain the software applications and databases that are utilized by physicians, nurses, and other clinicians. Other responsibilities may include designing and implementing education programs to assist in the adoption of new medical software, training new employees, and recommending system changes to assist clinical users. *The minimum education requirement is typically a bachelor's degree in nursing or pharmacy.*

Computer Support /Help Desk Specialists perform routine tasks to maintain computer equipment and provide technical assistance to end-users. *Knowledge of computer and software programs is preferred.*

Additional Healthcare Occupations

In addition to the High-Demand jobs, a career in healthcare offers many other opportunities.

ADMINISTRATIVE AND INFORMATION SERVICES CONTINUED

Health Information Management (HIM) Access Representatives design, implement, manage, and evaluate information systems and electronic health records. Health information managers incorporate the disciplines of medicine, management, finance, information technology, and regulatory requirements. *A bachelor's degree is required and national certification by the American Health Information Management Association (AHIMA) is preferred.*

Unit Secretaries are assigned to either inpatient or outpatient units where there is daily contact with patients. Unit secretaries streamline communications by providing relevant information to appropriate personnel, give information on patients' conditions, and direct visitors to the appropriate locations. They also process physicians' orders, such as orders to nursing, pharmacy, etc. In addition, unit secretaries make emergency calls, receive new admissions, prepare and maintain patient charts, maintain a daily log and clinic log, and perform various clerical duties as required. Unit secretaries might also be required to pick up and deliver supplies and records for the unit. *Generally, a high school diploma and computer proficiency are required.*

FACILITIES MANAGEMENT

Maintenance Mechanics diagnose, repair, and replace mechanical and electrical equipment as necessary. *Candidates must be proficient in the tools, instruments, and equipment necessary for maintenance and repair of electrical, mechanical, and utility systems and have a working knowledge of motors, boilers, compressors, control valves, HVAC, and other systems.*

Security Officers (unarmed) perform security tasks to guard hospital property against fire, theft, vandalism, and illegal entry. They promote the safety of visitors and staff. *These positions require a New York State security license.*

Stationary/Watch Engineers diagnose, repair, and replace equipment and components. They perform daily chemical analysis of hospitals' boilers and chillers and make necessary adjustments. *This position supports the power plant and HVAC engineers.*

Additional Healthcare Occupations

In addition to the High-Demand jobs, a career in healthcare offers many other opportunities.

LABORATORY AND TECHNICAL SERVICES

Cardiovascular Technologists assist physicians in diagnosing and treating cardiac (heart) and peripheral vascular (blood vessel) ailments with the use of imaging technology. Cardiovascular technologists and technicians conduct ultrasound or cardiovascular procedures, review doctors' interpretations and patient files, and monitor patients' heart rates. They also operate and care for testing equipment, explain test procedures, and compare findings to a standard to identify problems. Other day-to-day activities vary significantly between specialties. Cardiovascular technologists may specialize in any of three areas of practice: invasive cardiology, echocardiography, or vascular technology. *Preferred requirements are a certificate from a vocational school program or an associate's degree.*

Dialysis Technicians, under general supervision, set up and operate hemodialysis units and related equipment to provide dialysis treatment for patients with kidney disorders or failure. *More recently, these roles have been filled by licensed practical nurses, but candidates must pass a national certification exam to provide the service.*

Electroencephalographic (EEG) Technicians & Technologists operate the EEG machine, which records electrical brain activity and helps to diagnose brain disorders such as strokes and tumors. In addition to performing the electroencephalogram test, EEG technologists explain the testing procedure to the patient and obtain important background information from the patient. They then apply the electrodes to the patient's scalp, record the EEG, and prepare the EEG record for the doctor's review. *Technicians train on the job or in formal training programs generally given in clinics or hospitals. Many of these programs result either in a diploma or certification.*

EKG Technicians perform electrocardiograms (EKGs), and other routine, non-invasive cardiac procedures to measure and monitor cardiac activity. The EKG technician maintains department equipment and prepares reports for physician review. *Training is available at technical schools as part of "Medical Assistant" programs.*

Phlebotomists/Phlebotomy Technicians draw blood from patients and donors in hospitals, blood banks, or similar facilities and prepare specimens for screening, analysis, or other medical purposes. They perform screening tests and report results. *One to three months of phlebotomy certification is typically required.*

Additional Healthcare Occupations

In addition to the High-Demand jobs, a career in healthcare offers many other opportunities.

NURSES & PATIENT CARE

Certified Nurse Anesthetists administer anesthesia, monitor patient's vital signs, and oversee patient recovery from anesthesia in a variety of clinical settings. CRNAs may assist anesthesiologists, surgeons, other physicians, or dentists. *They must be registered nurses who have specialized graduate education through a program accredited by the Council on Accreditation of Nurse Anesthesia Programs. They must also pass a national certification exam offered by the National Board of Certification and Recertification of Nurse Anesthetists.*

Dental Hygienists & Dental Assistants are part of the oral health care team. Dental hygienists typically perform cleanings, apply preventative treatments, and assist dentists during advanced procedures. Hygienists achieve an associate's degree at a community college or vocational school and must pass a New York State licensure exam. Certified dental assistants perform functions such as taking patient histories, making impressions for dental casts, taking x-rays, and educating patients about oral health. *Dental assistants must complete a certificate program at a community college or vocational school, typically lasting nine to eleven months, and pass a state-approved certification exam.*

Home Health Aides provide services to homebound or disabled individuals and their families under the supervision of home care or social service agencies. Aides provide basic patient care under direct nursing supervision. They may bathe and feed patients, change linens and make beds. *Home health aides in New York State are required to successfully complete a 75-hour training and competency evaluation program, which is commonly provided on the job by the agency.* The training program includes classroom and supervised practical training in a laboratory, patient's home or other health care setting in which the trainee demonstrates knowledge while performing tasks on an individual under the direct supervision of a registered nurse or licensed practical nurse. *Home health aides can go on to complete an additional 125 hours of training to become an advanced home health aide. Advanced home health aides have an expanded scope of practice that allows for medication administration and injections.*

Nurse Midwife A New York State licensed midwife is a health care provider who may care for the health needs of pre-adolescent, adolescent, and adult women throughout their life span. Licensed midwives provide primary well-woman health care including gynecologic care, and care during pregnancy and childbirth, as well as care of the newborn following birth. *In New York State, a master's degree in midwifery or a related field and successful completion of an exam developed and administered by the American Midwifery Certification Board are requirements for licensure.*

Additional Healthcare Occupations

In addition to the High-Demand jobs, a career in healthcare offers many other opportunities.

NURSES & PATIENT CARE CONTINUED

Pharmacists are experts in the science of drugs and the art of drug therapy. They dispense drugs prescribed by physicians and other health practitioners and educate and inform consumers and patients about the use and possible effects of medication. Pharmacists also advise physicians and other health practitioners on the selection, dosages, interactions, and effects of medications. *To become a licensed pharmacist, candidates must graduate with a doctor of pharmacy (PharmD) degree from an accredited college of pharmacy, serve an internship under a licensed pharmacist, and pass a state examination (NAPLEX).*

Pharmacy Technicians prepare medications under the direction of a pharmacist. May measure, mix, count out, label, and record amounts and dosages of medications according to prescription orders. *Candidates must have a high school diploma or GED, have no felony convictions of any kind within 5 years of applying, and no drug or pharmacy-related felony convictions at any time. In New York State, only registered pharmacy technicians may assist with preparing a variety of medication, such as intravenous medications. To meet the 9 certification requirements for licensure as a registered pharmacy technician applicants must receive certification from a nationally accredited pharmacy technician program.*

Physician Assistants (PAs) provide healthcare services typically performed by a physician, under the supervision of a physician. Conduct complete physicals, provide treatment, and counsel patients. May, in some cases, prescribe medication. *Must graduate from an accredited educational program for physician assistants. The average PA program curriculum runs approximately 26 months, post-bachelor's degree. PAs must also pass a state licensing exam.*

NUTRITION

Diabetes Counselors & Diabetes Educators are most often registered nurses or registered dietitians with bachelor's degrees who have additionally completed a certification course in diabetes counseling. They educate diabetics on proper nutrition and medication management.

Dietitians promote and maintain health, prevent or treat illness, and aid rehabilitation through nutrition, education, and diet. Certified dietitians (also called certified nutritionists) may manage a food service, plan menus for people with health problems, and give instruction on proper diet. *To become a certified dietitian, candidates must complete an associate's degree program in dietetics/nutrition and have eight years of professional experience, or hold a bachelor's degree and have six months of relevant experience; either of these educational tracks qualifies candidates to sit for a state- approved licensure exam.*

Additional Healthcare Occupations

In addition to the High-Demand jobs, a career in healthcare offers many other opportunities.

NUTRITION CONTINUED

Dietetic Technicians & Dietetic Assistants assist dietitians in food administration and nutrition care services. *Dietetic technicians complete an associate's degree while dietetic assistants usually complete a one-year program. These programs generally are given in vocational schools and community colleges.*

RADIOLOGY

Nuclear Medicine Technologists, under a physician's supervision, use a scanner to create images of a patient's body. They prepare and administer radioactive drugs to patients undergoing the scan. *Generally, training programs are two years long and are offered by community colleges, universities, hospitals, or the military. A certificate from an approved Nuclear Medicine Program, or certification by the Nuclear Medicine Technologist Certification Board or the American Registry for Radiologic Technologists is required.*

Radiation Therapy Technologists apply radiation to the human body under the supervision of a radiologist to treat disease, often cancer. *A one- or two-year program in radiation therapy technology, which may be given by a hospital or community college, is usually required. Several bachelor's degree programs are also available.*

Ultrasound Technologists use special imaging equipment that directs sound waves into a patient's body (commonly known as ultrasounds, sonograms, or echocardiograms) that assess and diagnose various medical conditions. *Minimum education requirements are the completion of a two-year program with certificate and passage of a diagnostic medical sonography exam.*

THERAPY SERVICES

Audiologists are specialists in communication disorders. Hearing and balance disorders are assessed and treated by an audiologist. Audiologists identify the type of hearing loss and select, fit, and dispense amplification systems such as hearing aids. *A doctoral degree, 36 weeks of supervised experience and a passing grade on a national exam are required for licensure.*

Speech-Language Pathologists are specialists in communication disorders. Speech-language pathologists assess and treat speech and language development disorders and swallowing difficulties. *A master's degree and licensure by New York State are required.*

Additional Healthcare Occupations

In addition to the High-Demand jobs, a career in healthcare offers many other opportunities.

THERAPY SERVICES CONTINUED

Occupational Therapists & Occupational Therapy Assistants are licensed healthcare professionals who are trained to treat people of all ages who must learn or regain the skills needed to live independently. Occupational therapists can work in a variety of treatment settings including hospitals, nursing homes, schools, private practice, or home care. Within hospitals, occupational therapists may work in rehabilitative units, acute care units or outpatient departments. *Occupational therapists must complete a bachelor's degree in occupational therapy and have six months of supervised experience, then pass a state-approved certification exam to obtain licensure. Occupational therapy assistants carry out treatment plans under the direction of a licensed occupational therapist. They must complete an associate's degree program, which typically includes at least three months of supervised experience, and pass a state approved certification exam. Both occupational therapists and occupational therapy assistants are required to complete 36 hours of continuing education every three years.*

Physical Therapists & Physical Therapy Assistants work with people who have been physically disabled by illness, accident, or congenital anomaly. They treat a wide variety of conditions, including musculoskeletal and orthopedic conditions, neurological conditions, balance and coordination disorders, gait disorders, and sports and athletic injuries. Upon a physician's referral, therapists evaluate the extent of disability and plan a treatment program. Physical therapy assistants perform routine treatment procedures as directed by the therapist, assist with more complex procedures, and may perform some administrative tasks. They work under the direction of a physical therapist. *Physical therapists complete a master's degree or an entry level doctorate of physical therapy degree (DPT) and pass the National Physical Therapy Examination to obtain licensure. Physical therapy assistants complete an associate's degree.*

Recreational Therapists plan, direct, or coordinate medically-approved recreation programs for patients in hospitals, nursing homes, or other institutions. Activities include sports, trips, dramatics, social activities, and crafts. May assess a patient condition and recommend appropriate recreational activity. *Most entry-level recreational therapists need a bachelor's degree in therapeutic recreation, or in recreation with a concentration in therapeutic recreation.*

Respiratory Therapy Technicians, under the supervision of a respiratory therapist, perform tasks and responsibilities within the framework of the practice of respiratory therapy. Tasks include the performance of cardiopulmonary evaluation, respiratory therapy, treatment techniques, and education of the patient, family, and public. *Respiratory therapy technicians must be licensed by the State of New York.*

WCA Member Education & Training Provider List

Adelphi University | adelphi.edu

Adelphi University offers 120+ exceptional undergraduate and graduate programs through eight schools and colleges. The main campus in Garden City and dynamic learning hubs in Manhattan, the Hudson Valley, Suffolk County, and online serve a diverse population of nearly 8,000 students from 44 states and 64 countries.

Locations:
- Garden City
- Manhattan Center
- Hudson Valley Center Poughkeepsie
- Hudson Valley Center Middletown
- Hauppauge Center

College of Westchester | cw.edu

The College of Westchester (CW) offers programs at the certificate, associate degree, and baccalaureate levels in accounting, business, digital media marketing, computer network administration, information technology, and healthcare, including both clinical and administrative functions.

Location: White Plains

Fordham University | fordham.edu

Fordham University, the Jesuit University of New York, is committed to the discovery of Wisdom and the transmission of Learning, through research and through undergraduate, graduate and professional education of the highest quality.

Locations:
- Bronx
- Lincoln Center
- Westchester

Iona University | iona.edu

With nearly 50 undergraduate programs and more than 40 graduate programs, Iona offers rigorous, quality academics across a wide range of disciplines. Students receive exceptional education in their field of study. All programs emphasize skills needed in the real world: critical thinking, effective communication, adaptability, and creative problem-solving.

Locations:
- Bronxville
- New Rochelle

WCA Member Education & Training Provider List Continued

Long Island University Hudson Valley | liu.edu

Long Island University, founded in 1926, continues to redefine higher education, providing high quality academic instruction by world-class faculty. Recognized by Forbes for its emphasis on experiential learning and by the Brookings Institution for its “value added” to student outcomes, LIU offers over 220 degree programs, with a network of over 285,000 alumni that includes industry leaders and entrepreneurs across the globe.

Location: Purchase

Manhattan University | manhattan.edu

Manhattan University is ranked as one of the top schools in the nation for having graduates that get jobs and earn high salaries. While securing employment is important, career preparation at Manhattan University is about more than just finding a job. The Office of Career Pathways helps to guide students towards a meaningful and purpose-driven career.

Location: Bronx
