

STORIFY TUTORIAL

Storify is a tool that students can use to tell a story using social media, or showcase their tweets, posts, pictures, and videos, all on one page.

1. Log into Storify: <https://storify.com/>
2. Visit Storify.com by using Google Chrome, Safari, or Firefox. Click **sign up** and sign in by using Facebook, Twitter, or your email address.

Storify
by livefyre

Signing up on Storify only takes 17 seconds and allows you to create stories, follow interesting people and engage on stories.

Take the tour or login if you have an account.

3. Create a new story: The “New Story” button is located at the top of the screen.

4. First steps:

- ◆ Storify will now walk you through giving your story a title, a description, searching for elements and adding text. The red arrow below points to the headline fields. The blue arrow points to the description field. The search field is highlighted in yellow.

Search Saved Elements Stories Elements

☒ All ☐ Quotes ☐ Images ☐ Videos ☐ Links

Search ...

Select a network above and search for social media content. You can add networks by clicking the '+'.
 Add Content
 Drag the best elements into your story and add your own content

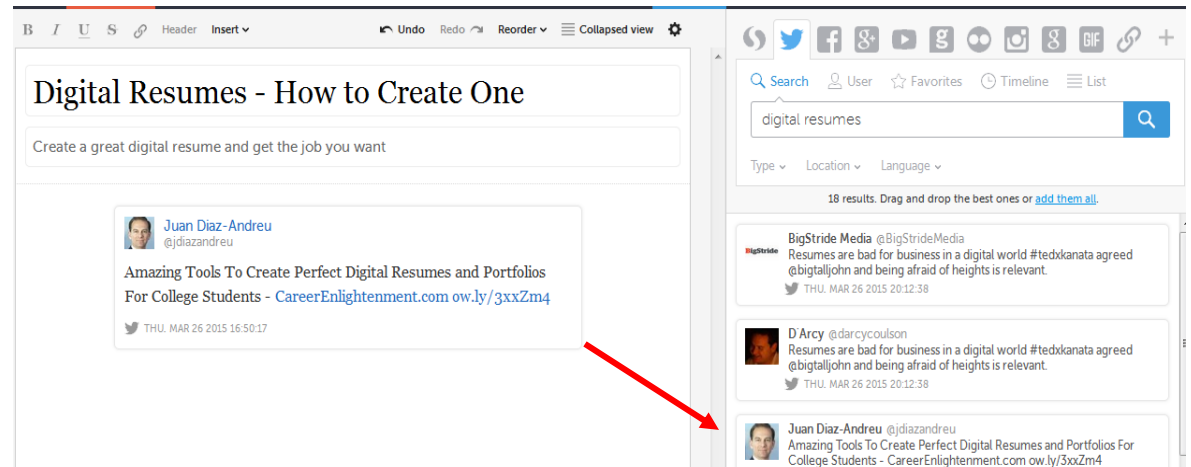

SEARCH FOR CONTENT:

- ◆ In the search field, you can search keywords on social networking sites like Twitter, Facebook, Flickr, YouTube, and Google.
- ◆ Choose which site you want to search under, for example Twitter, then enter a search term, example “digital resumes”. You can either use a hashtag or a keyword/phrase. Now you can easily grab content from that website by dragging it into your timeline, or

double - clicking the post. Once it is on your timeline, you can rearrange the order by dragging the post to where you want it.

While searching Twitter, you may want to exclude retweets, which you can do by unchecking a box you see just below the search field. This eliminates most duplicate tweets.

ADD TEXT:

If you hover the mouse over the newly dragged post, you may “Click to Add Text” to type a reaction to that particular post. (Note that this “Click to Add Text” bar only appears when you move your cursor onto your timeline.) You can provide a running commentary if you’d like. Maybe you want to separate photos out into categories, or give chronological headings.

SEARCH FOR VIDEO CONTENT:

If you would like to include videos to tell your story, you can change your search to YouTube, and search as you would for a post from Twitter. Then, as you did earlier, you drag it into your timeline exactly where you want it-or double-click the video and it will appear at the top of your timeline

PUBLISH YOUR STORY:

Click "Save now," Then to publish a story, you must click the blue "Publish" button.

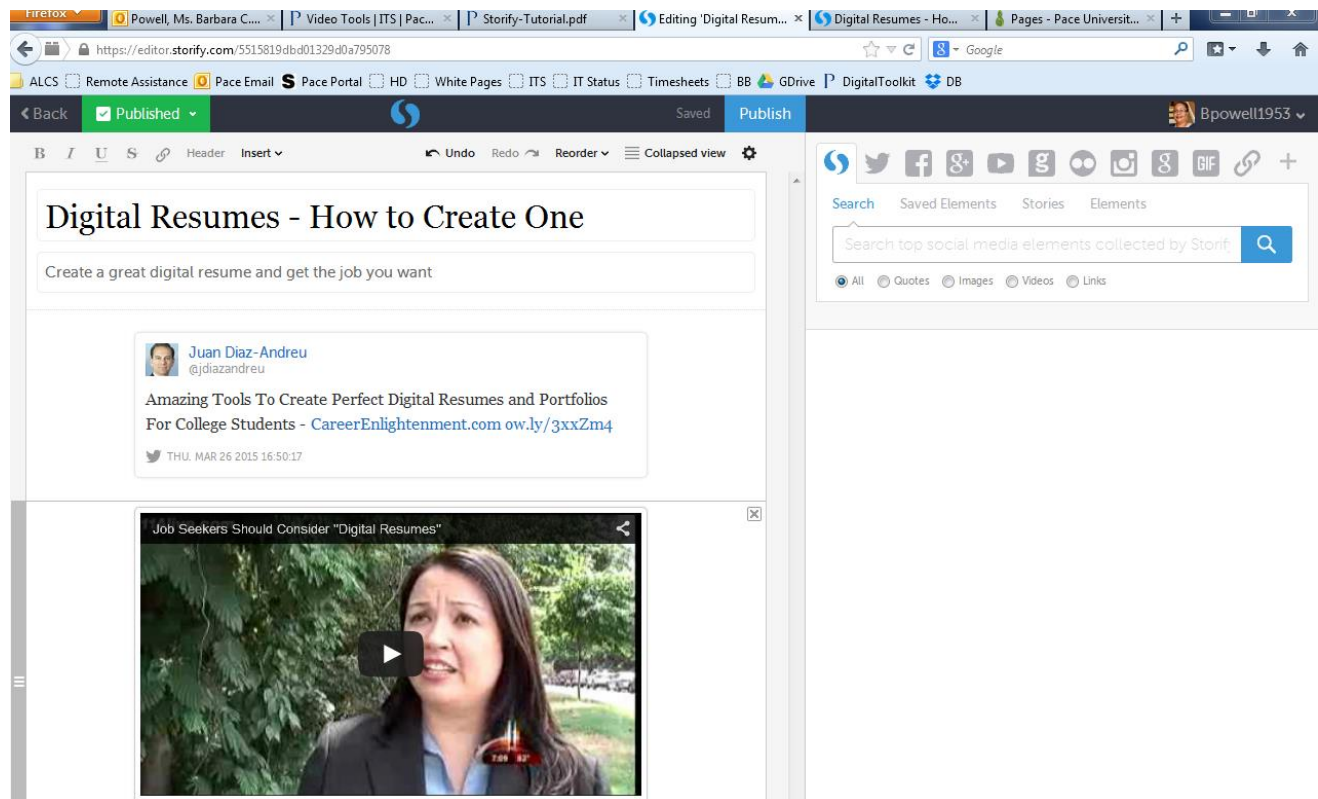

Next, a screen will come up called "Share." Notify allows you to type a customized message to let people know that you have re-posted their posts/images/videos. This is not necessary for you to publish your story, but it may be to your benefit. People may retweet these messages, and send others to see your story on your website. Now, more people will visit your site.

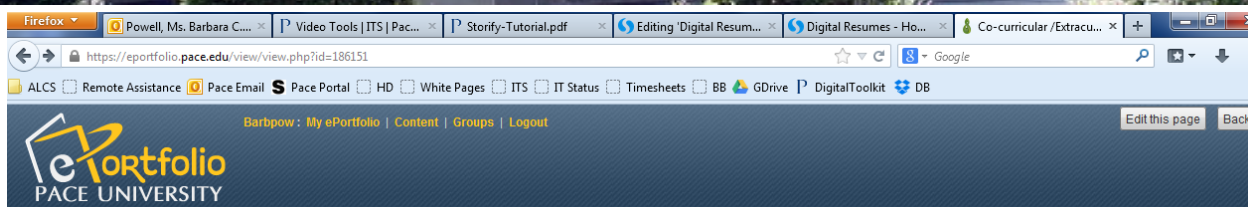

ADD YOUR STORY TO ePORTFOLIO:

Have your Storify page open in a different window. You must use Mozilla Firefox. Copy the URL of your Story that you want to include on your ePortfolio page.

Next, **open ePortfolio** with Mozilla Firefox. Click “My ePortfolio,” and choose whichever page you would like to include your Story in, then click “edit this page”.
