

Blackboard Collaborate Mobile App

Web Conferencing on the go

Best Practices

- Students can join live sessions from iPhone, iPad, or Android devices
- Students can interact via text chat and two-way audio
- Students can use emoticons, hand raising, polls, and breakout rooms

Limitations

- It is not suggested that moderators use the app for leading sessions
- Students cannot annotate on the Whiteboard
- The web tour option is not yet available
- Presenters should keep in mind that there is a short lag between what shows on their screen and what shows on the participant screen
