

Connecting an iPhone/iPad/iPod Touch to PACE-WIRELESS

Introduction

This page provides instructions for how to connect an iPhone/iPad/iPod Touch to **PACE-WIRELESS**.

Connecting an iPhone/iPad/iPod Touch to PACE-WIRELESS

- open **Settings** and select **Wi-Fi**

The *Wi-Fi* screen displays:

- select **PACE-OPEN**

Note: You will be redirected to the guest portal. Depending on the iOS and device, PACE-OPEN system may launch the application without visiting a webpage.

The *Log In* page displays:

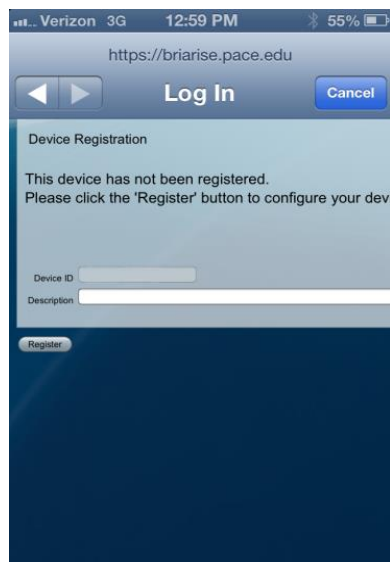

- type your **MyPace Portal Username** and **Password** in the fields provided and log in

Note: the Device ID field will populate with the MAC address of your device.

To register your device:

- add a description of the device in the **Description** field (e.g., Joes iPhone)
- click **Register**

The *Install Profile* screen displays:

- click **Install**

- click **Install Now**

- type *your MyPace Portal Password* for Wi-Fi account and click **Next**

The *Profile Installed* screen displays:

- click **Done**

- open **Settings** and select **Wi-Fi**
- select **PACE-WIRELESS**
- click **Accept for certificate**

Note: Connection via PACE-OPEN is a one-time process. Once a device has been properly registered (users can register up to 5 devices) via PACE-OPEN, faculty, staff, and students will be able to connect directly to PACE-WIRELESS by entering their MyPace Username and Password.
